Democracy at a Crossroads Gregory L. Samuels, Amy Samuels, 2019-06-01 At a time of questionable civility in American politics democratic education appears to be at a crossroads As we consider how to best explore democracy and foster a more civically engaged populace in the current socio-political context it is critical to examine what frames our educational systems policies and practices and shapes our civic identity While teachers struggle with decreased instructional time for social studies and the demands of standardized tests the social sciences are often pushed to the margins Reflecting on how to negotiate local state national and global tensions related to policy and practice educators work

to do what is best to equip students to foster democratic citizenship and ideals Social sciences educators are uniquely positioned to embrace a journey that upholds democratic ideals of equality freedom and justice while simultaneously critiquing inequity and injustice in schools and our society The contributors to this volume situate a variety of discussions within the context of the crossroads and explore how to negotiate translate and reconceptualize our own beliefs and positionings in ways that positively influence and empower students teachers teacher educators and education policy makers Studies are presented related to civic education cross cultural interpretations emotional citizenship international economics and race consciousness as well as those that discuss how to challenge dominant narratives and negotiate educational policies and practices [A Republic, If We Can Teach It](#) Jeffrey Sikkenga, David Davenport, 2024-05-14

America faces a crisis in civic education that imperils the long term health of our country Too many Americans especially young people do not have the knowledge of our history and principles necessary to sustain our republic Recent national test results reveal the sad state of civic education in our schools The 2022 report of the National Assessment of Educational Progress showed that only 22 percent of eighth graders tested were proficient or better in their knowledge of civics and proficiency in US history dropped to an anemic 13 percent The Annenberg Policy Center reported in 2019 that only 39 percent of Americans could name the three branches of government while its 2017 study showed that 37 percent could not name a single right in the First Amendment How can we keep a republic as Benjamin Franklin put it if we don't know what a republic is At a deeper level the crisis is not simply about facts and information If the next generations of Americans do not come to understand that our history and principles are good and that they merit their affection our experiment in self government could fail Action is needed now to reverse the trend

Reframing Police Education and Freedom in America Martin Alan Greenberg, Beth Allen Easterling, 2023-09-15 This book untangles the components of police education and advocates a robust community based training model with significant civilian oversight The recommended approach recognizes that the citizenry needs to be included in the provision of basic police education for it is they who must both support and be served by their police The police must be role models for society demonstrating that freedom and rights come with obligations both to the community as a whole and to individuals in need within that community Ultimately the quality of police training and the public s safety depend not only on the leadership of police executives as well as the quality of educational institutions and police candidates but also on the building of a community s trust in its police The issues of police recruitment education and retention have greater consequence in an era when protests and other signs of negativity surround law enforcement Several incidents including most notably George Floyd s murder by police have sparked new training initiatives regarding police de escalation and community engagement At the same time the proliferation of gun violence and a contentious political climate have led some officers to refrain from undertaking proactive types of policing In this context reform of the police education system is urgent This book examines police training at all levels of government

local regional state and federal In addition citizen participation programs including the role of the media and programs for furthering law related education LRE are highlighted The proposed police education model recognizes that ordinary members of the American public need to contribute to the provision of basic police education for it is they who must both support and be served by their police The focus is on teaching a guardian style of policing at the local level Police education would combine higher education necessary practical proficiencies and intensive field experiences through a gradual level of greater responsibility likely extending over a 2 plus year period for trainees with less than a year of previous college credits This book will be of interest to a wide range of audiences such as law enforcement professionals and trainers including those in executive development programs in police departments community leaders scholars and policy experts who specialize in policing concerned citizens and students of criminal justice especially those interested in police organization and management criminal justice policy and the historical development of police *Adolescent Education* Joseph L. DeVitis,Linda Irwin-DeVitis,2010 This book elucidates the complexities contradictions and confusion surrounding adolescence in American culture and education
