The Cambridge Handbook of Consumer Privacy Evan Selinger, Jules Polonetsky, Omer Tene, 2018-04-02. Businesses are rushing to collect personal data to fuel surging demand. Data enthusiasts claim personal information that is obtained from the commercial internet including mobile platforms, social networks, cloud computing and connected devices will unlock path breaking innovation including advanced data security. By contrast regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems. As the Internet of Things matures and facial recognition, predictive analytics, big data and wearable tracking grow in power, scale and scope, a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis. The only productive way forward is to get a grip on the key problems right now and change the conversation. That is exactly what Jules Polonetsky, Omer Tene and Evan Selinger do. They bring together diverse views from leading academics, business leaders and policymakers to discuss the opportunities and challenges of the new data economy.

The Dynamics of Corporate Social Responsibility Maria Aluchna, Samuel O. Idowu, 2016-12-27. This book explores recent developments in the theory, strategic perspective and international practice of corporate social responsibility. In particular, it discusses the consequences of the economic slowdown apparent in many economies and the impact of changes in the regulatory environment. It consists of three parts. Part one addresses a variety of theoretical approaches as well as the dynamics and criticism of corporate social responsibility. It takes into account social and governmental expectations for the new and extended role of companies in the economy and in society and provides a new context and theoretical assumptions regarding the functions and tasks of corporate social responsibility. Part two discusses the practical aspects relating to strategic management and corporate governance, corporate disclosure and reporting as well as the empowerment of stakeholders. Lastly, part three focuses on the international practice of corporate social responsibility in various organizational and institutional settings. Using numerous case studies, the book explores the challenges and tasks of CSR in emerging markets, in the fashion industry and in global and family companies. It identifies the changes that can be detected following the financial crisis, closing the loop and linking the empirical findings with the revised theoretical framework.
