Sustainable Construction and Heritage Conservation in the Digital Age

Gunasagaran, Sujatavani, Kam, Kenn Jhun, 2025-06-17 The digital age reshapes the approaches to sustainable construction
and heritage conservation As urbanization increases and environmental concerns rise the construction industry faces
pressures to reduce its ecological footprint while preserving cultural and historical sites Digital technologies bridge this gap
by enabling more precise planning efficient resource use and informed decision making These tools enhance the
sustainability of new constructions while also supporting the restoration and reuse of heritage structures By integrating
tradition with innovation the digital era offers a path to responsible builds that prioritize historical conservation for future
generations Sustainable Construction and Heritage Conservation in the Digital Age explores the integration of digital
technology in construction and conservation practices It examines the use of sustainable strategies for improved urban
development community preservation and civil engineering This book covers topics such as digital technology architecture
and smart infrastructure and is a useful resource for sociologists business owners urban developers engineers academicians
researchers and scientists
