**Dictionary of Acronyms and Technical Abbreviations** Jakob Vlietstra,2012-12-06 My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC All acronyms used in this introduction are listed in this dictionary To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts There was of course the well known acronym associated with the NT but at that time I did not realize that it meant more than the postal service in those years a deteriorated service Gradually the daily use of acronyms grew Most of the newly acquired three and four letter abbreviations referred to organizations such as the broadcasting corporations in The Netherlands and Belgium and references to countries such as the USA USSR and UK When attending high school the HBS after the war my knowledge of acronyms grew slowly Even during the ten years I spent in the Dutch Merchant Marine the GHV the number of acronyms was limited to advanced equipment that eventually became known as RADAR LORAN and DECCA      **Experimental**

**Econophysics** Ji-Ping Huang,2014-08-05 Experimental Econophysics describes the method of controlled human experiments which is developed by physicists to study some problems in economics or finance namely stylized facts fluctuation phenomena herd behavior contrarian behavior hedge behavior cooperation business cycles partial information risk management and stock prediction Experimental econophysics together with empirical econophysics are two branches of the field of econophysics The latter one has been extensively discussed in the existing books while the former one has been seldom touched In this book the author will focus on the branch of experimental econophysics Empirical econophysics is based on the analysis of data in real markets by using some statistical tools borrowed from traditional statistical physics Differently inspired by the role of controlled experiments and system modelling for computer simulations and or analytical theory in developing modern physics experimental econophysics specially relies on controlled human experiments in the laboratory producing data for analysis together with agent based modelling for computer simulations and or analytical theory with an aim at revealing the general cause effect relationship between specific parameters and emergent properties of real economic financial markets This book covers the basic concepts experimental methods modelling approaches and latest progress in the field of experimental econophysics      **Coyote Springs Investment Planned Development Project** ,2008
