The Making of Tests for Index Numbers Arthur Vogt, Janos Barta, 2013-03-14 Arthur Vogt has devoted a great deal of his scientific efforts to both person and work of Irving Fisher This book written with J nos Barta gives an excellent impression of Fisher s great contributions to the theory of the price index on the one hand On the other hand it continues Fisher s work on this subject along the lines which several authors drew with respect to price index theory since Fisher s death fifty years ago This is a highly instructive book on both the history and theory of measurement in economics It is rather a rich source of interesting properties of more or less well known indices and famous men especially Irving Fisher than a precise mathematical text on the axiomatic foundations of indices Foreword by Wolfgang Eichhorn
