Borman, 2013-10-11 This monumental collection presents the first ever sociological analysis of the No Child Left Behind Act and its effects on children teachers parents and schools More importantly these leading sociologists consider whether NCLB can or will accomplish its major goal to eliminate the achievement gap by 2014 Based on theoretical and empirical research the essays examine the history of federal educational policy and place NCLB in a larger sociological and historical context Taking up a number of policy areas affected by the law including accountability and assessment curriculum and instruction teacher quality parental involvement school choice and urban education this book examines the effects of NCLB on different groups of students and schools and the ways in which school organization and structure affect achievement No Child Left Behind concludes with a discussion of the important contributions of sociological research and sociological analysis integral to understanding the limits and possibilities of the law to reduce the achievement gap Learning from the Federal Market? Based Reforms William J. Mathis, Tina M. Trujillo, 2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation's most prominent researchers the book explores the major elements of these reforms as well as the social political and educational

contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity

Getting to Excellence James A Johnson, Jr PhD, 2013-03 This book is about a journey with the Center for Strategic Alliances in Education for School and District Improvement with stakeholders in a school targeted for school improvement The first chapter puts into context the notion of school its purpose and the incumbent variables of values attitudes organizational and leadership behaviors and instructional practices Throughout the book the authors look at three contextual boundaries 1 historical 2 the lens of former students and their perceptions of the presence or absence of those variables and 3 a comparison of labeled schools and the views and perceptions of stakeholders with regard to quality equity and adequacy This is a compelling journey which utilizes quantitative and qualitative data to take a critical look at the processes involved and the strategies used in America s journey in the quest for excellence The authors story is one of the pursuits of innovation reinvention equity excellence and culturally relevant education experiences that inspire and reframe the discussion about getting to excellence The book is replete with illustrations of weaknesses hidden in abstract policies institutional persistence and culturally void programs methodologies and practices It advocates a methodology for arriving at well conceived processes for achieving acceptance and academic excellence through collaboration among those to whom education is important the children and the communities where they live
