**The College Buzz Book** Carolyn C. Wise, Stephanie Hauser, 2007-03-26 Many guides claim to offer an insider view of top undergraduate programs but no publisher understands insider information like Vault and none of these guides provides the rich detail that Vault's new guide does. Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions. Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni. Through these narratives Vault provides applicants with detailed balanced perspectives.

*Writing Across Distances and Disciplines* Joyce Magnotto Neff, Carl Whithaus, 2009-03-04 Writing Across Distances and Disciplines addresses questions that cross borders between onsite hybrid and distributed learning environments between higher education and the workplace and between distance education and composition pedagogy. This groundbreaking volume raises critical issues, clarifies key terms, reviews history and theory, analyzes current research, reconsiders pedagogy, explores specific applications of WAC and WID in distributed environments and considers what business and education might teach one another about writing and learning. Exploring the intersection of writing across the curriculum, composition studies and distance learning, it provides an in depth look at issues of importance to students, faculty and administrators regarding the technological future of writing and learning in higher education.

**Educational Research and the Question(s) of Time** David R. Cole, Mehri Mirzaei Rafe, Gui Ying Annie Yang-Heim, 2024-06-24 This book fully explores the question(s) of time in educational research and achieves the acceleration and merging of inquiry with action to understand change and implement these findings through practice. It deals with the philosophy of education, higher education, schooling, the curriculum, time displacement, technology, the environment and policy. This book focuses on time revolutions. It explores new ways of thinking about time that question a linear arrow in time and sets into motion an educational research agenda to extract revolutions of time. Furthermore, this book figures the dimension of time in teaching and learning by extending and deepening the engagement with time in education. For example, it analyzes the climate crisis in terms of education and how the realization that the climate is changing sits parallel and adjacent to pedagogy. The climate crisis and how to do anything about it through education is an example of how considering the dimension of time opens up education beyond quick or narrow fixes and introduces a profound synthesis for the future.

rubble and its museumification Ruins are predicated on the interplay between presence and absence they remind us of caducity while conjuring up the spectrum of the completeness that would negate them They can awaken the eeriness of the disintegrating modern city and serve as a metaphor for institutional decay But they can also underpin proposals of restoration through salvage and reuse of the rubble
