Perspecta 56 Guillermo Acosta Navarrete,Gabriel Gutierrez Huerta,2024-07-23 Exploring architecture as a form of concealment and obfuscation in engendering new ways of understanding conceptualizing and reshaping the world Architecture is the perfect form of camouflage As buildings recede into the background of everyday life the myriad forces that shape our natural social and political landscapes hide in plain sight Embedded within the spatial and material organizations of the built environment are ideas of value hierarchy and control that tilt the ground and influence perception in the name of endless competing interests Operating across multiple scales and mediums architectural camouflage gives familiar form to obscure objectives Design transforms and encodes our shared environments from domestic domains to digital territories through its material practices aesthetics and discourses Immanent in the periphery architecture's images are internalized as forms for understanding and reshaping the world Camouflage in turn dwells in the architecture of our collective subconscious Latent within architecture's deceptions is a profound capacity to reflect the elusive intentions and surreal ambiguities of our ecological entanglements In masking hierarchies and shifting sensitivities to what escapes perception architecture can engender vital questions around the agency and significance of its world making practices
