

## KEY FEATURES

Large, bright, high-resolution screen makes navigation control easy.

Optimized for Trimble Survey Field software.

Fully integrated camera, GPS navigation, and communications.

Integrated collaboration and control through context connectivity.

The Trimble® TSC3 controller with Trimble Survey Field™ software is a groundbreaking handheld field computing solution that streamlines the flow of everyday surveying work and the number of devices present in the field.

### APPROXIMATELY 50% FASTER SURVEYING SOFTWARE

The fastest in a handheld line of field controllers, the Trimble TSC3 controller is rugged and designed for surveyor conditions. It performs Trimble Survey operations fast and delivers simpler power for low productivity applications on the Windows® platform.

### MAKE THE MOST OF EXISTING AND NEW HARDWARE

With an optional 5MP autofocus camera and GPS flash, you can take digital photographs of your job site right from the controller. No externalities, batteries, or file transfers are required, and images are automatically geotagged for easy identification.

Easily record the qualitative information that survey data often conveys into rich-media conditions or work programs. The benefits of including images as part of your workflow are clear: decisions made easy, data transfer to the field greatly enhanced.

### COMMUNICATES THE BIGGEST HEAD-AND-NECK ISSUE

The TSC3 controller enables wireless Internet connectivity through an integrated 802.11n Wi-Fi module. This allows Trimble Survey software to facilitate a constant flow of information between field and office, including real-time synchronization of field and office data sets. Trimble Survey software then can download and upload important files any time and from anywhere, so needed data collection, processing, analysis, and delivery are faster and more efficient.

A variety of communication options let you transfer critical information no matter the environment. Connect with 4G LTE connectivity using the internal module. Access your office network through 802.11 Wi-Fi, or 3G and serial (RS-485) communications options.

### FOR ALL OF YOUR SURVEYING APPLICATIONS

The rugged TSC3 controller is purpose-built to make both integrated surveying and spatial imaging jobs easier, more efficient, and more flexible.

- **Easy-to-use interface:** Control your survey and verify your work on the large, bright, high-resolution LCD touchscreen. With the option of a COVERT™ (a commercial-grade numeric keypad) data entry is quick and easy.
- **Autonomous Computer:** Facilitate efficient work from either your own stationary or moving hardware.
- **Integrated GPS:** Ensure 100% search on a conventional survey method or internal GPS receiver. You can also manage and find control points and other points quickly.
- **Global Standard:** Incorporate wireless technology infrastructure in surveying systems. An internal 2.4 GHz radio option makes ideal for controlling Trimble robotic systems.

A fully integrated controller with a bright, daylight-readable display will make your field work more efficient.
