Pattern Recognition for Reliability Assessment of Water Distribution Networks N. Trifunovic, 2012-02-13 This study investigates the patterns that describe reliability of water distribution networks focusing to the node connectivity energy balance and economics of construction operation and maintenance A number of measures to evaluate the network resilience has been developed and assessed to arrive at more accurate diagnostics of regular and irregular demand scenarios These measures have been proposed as a part of the methodology for snap shot assessment of network reliability based on its configuration and hydraulic performance Practical outcome of the research is the decision support tool for reliability based design of water distribution networks This computer package named NEDRA Network Design and Reliability Assessment consists of the modules for network generation filtering initialisation optimisation diagnostics and cost calculation which can be used for sensitivity analyses of single network layout or assessments of multiple layouts The study concludes that none of the analysed aspects develops clear singular patterns

Nevertheless the proposed network buffer index NBI and the hydraulic reliability diagram HRD as visual representation of the network resilience give sufficient snap shot pointing the composition of the index value and displaying possible weak points in the network that can be hidden behind the averaged values of various reliability measures *Polymers and Two-Dimensional Nanocomposites* Rotimi Sadiku, Yskandar Hamam, Suprakas Sinha Ray, Oladipo Folorunso, 2024-11-23 *Polymers and Two Dimensional Nanocomposites* provides a detailed review of recent progress in this important research field The chapters cover new developments in synthesis methods fabrication techniques sample preparation methods surface modification characterization methods of enhancing the properties of these materials and industrial applications in energy environmental oil and gas sensors corrosion biomedical and structural applications The book provides a valuable reference resource for academic and industrial researchers materials scientists and engineers working in the fields of polymer science and engineering polymer composites and nanocomposites Covers recent developments in synthesis characterization properties and applications Discusses new fabrication techniques and how to select the right processing conditions Systematic presentation of theoretical and experimental investigation of properties for various industrial applications Attention is given to current challenges and future improvements *Proceedings of the International Conference Theory and Applications in the Knowledge Economy* Eduardo Tomé, 2016-07-08 Foreword TAKE 2016 is a dream that came true In about six months a group of friends and colleagues put together in an upcoming and very dynamic university a conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries This is awesome I would like to deeply thank Aveiro University the GOVCOPP research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support I want to have two special words one for Blazenka Knezevic without whom the website would not have been possible the other for Gaby Neumann for work in these Proceedings Scientifically TAKE seems to be as important and new and far reaching We don't have shortage of models regarding the knowledge economy but we decisively lack to explore the relation between theory and practice TAKE is a step in exploring that difference We know that Exact sciences find the best answers and social sciences give the best questions J C Spender and we also know that Knowledge Management is more preached by scholars than done by practitioners Aino Kianto We assume the first idea and try to overcome the second Hopefully TAKE 2016 will be a great success Thank you for everything *Biomedical and Environmental Sensing* J.
