

"First he thought it was his set, then he got a Turner Super Sidekick"

Last year, you were hearing about a new Turner mike, the Super Sidekick. About how the two gain controls give you as much or as little gain as you need for full signal modulation. About how you can use the Super Sidekick with an AM tube set or, with equal success, SSB on a transistorized rig. And about how the dynamic element clearly gives your signal plenty of punch.

This year, thousands of CBers have Turner Super Sidekicks on all kinds of base sets. And it's doing great things for them. How do we know? Because they're telling us about it!
