and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies
