Primary English Curriculum Guide Christine

Moorcroft, Ray Barker, 2013-11-26 First Published in 2001 The purpose of this curriculum guide is to help student teachers and newly qualified teachers to make a start on learning how to become competent teachers of English Despite the emphasis given in training courses to the teaching of English newly qualified teachers often feel underprepared for it and frequently mention their concerns about this These concerns can be partly explained by a general lack of confidence in this key area and partly by widespread media and political criticism of the teaching of literacy It is also because it is often difficult for a student to make the connection between observation of key teaching strategies and his or her own personal practice **Goyal's**

**Learning Beyond the Objective in Primary Education** Ruth Wills, 2019-06-18 *Learning Beyond the Objective in Primary Education* explores an existential perspective for pedagogy proposed in response to the current technocratic paradigm of education prevalent in many countries worldwide. This new perspective is termed *Bildung's Repetition*. The book seeks to encourage policy makers and educational practitioners to consider the impact of education on children over and above the meeting of set targets and objectives. Located in a philosophical framework, this book considers how children might learn authentically in the light of their own personal contingency. A series of case studies reflecting the effectiveness of this perspective through the curriculum is provided, each illustrating how *Bildung's Repetition* allows for personalized meaningful learning within current structures. Recommendations for practice are provided, encouraging all stakeholders in education to consider the value of this perspective and effect a ten-degree shift within educational thought. This unique book fuses theory with practice and will be of great interest to academics, researchers, and students in the fields of primary education and teacher training. It will also be of interest to school leaders and practicing teachers.

**Assessment for Learning and Teaching in Primary Schools** Mary Briggs, Angela Woodfield, Peter Swatton, Cynthia Martin, 2008-04-25 This core text for primary trainee teachers is a clear introduction to the different kinds of assessment and their purposes. Throughout the book, tasks encourage the reader to practise assessment skills and to reflect on planning, listening, questioning, observing, diagnosing, and target setting. This second edition is referenced throughout to the 2007 QTS Standards and has been fully updated to reflect the Primary National Strategy and key initiatives such as *Every Child Matters*. There is increased emphasis on peer assessment and target setting linked to personalised learning. In addition, new material on Early Years observation and foundation core subjects has been added.

**Making Sense of Education in Post-Handover Hong Kong** Thomas Kwan-Choi Tse, Michael H. Lee, 2016-11-10 Since 1997 when Hong Kong became a Special Administrative Region of the People's Republic of China, a string of education reforms have been introduced to improve the quality of education and maintain Hong Kong's economic competitiveness in the age of globalization. This book provides a comprehensive and critical analysis of major issues and challenges faced by the education system, ranging from pre-school to higher education. It analyses the prospects for educational development in Hong Kong. It further addresses how the Hong Kong government has responded to the perceived challenges of the external environment and internal forces and explains the rationales for the actions taken. Not only does it review how the reform initiative challenges have been dealt with, it also reviews how effective these initiatives are and its implications on future directions.

**School Choice in China** Wu Xiaoxin, 2013-10-15 *School Choice in China* explores the major characteristics of schooling options in China, highlighting how largely middle-class parents exploit their cultural, economic, and social capital for their children's admission into choice schools. It highlights how payments such as choice fees, donations, prize-winning certificates, and awards, as well as the use of *guanxi*, result in Chinese

school choice as a parent driven bottom up movement The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns leading to policies that accommodate the needs of mostly middle class families He argues that although this system seems to create winners among the parties involved it exacerbates the educational inequality that already exists in Chinese society Chapters include Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices but also a study of the competitive middle class search for advantage for their children As such it will be beneficial to undergraduates postgraduates education professionals policy makers and anyone with an interest in education sociology social policy and the rise and future of China      **Report of the Committee of Council on Education in Scotland** Great Britain.
