Children's Ways with Science and Literacy Maria Varelas, Christine C. Pappas, 2013-05-07 Science is often a forgotten subject in early elementary grades as various mandates require teachers to focus on teaching young students to achieve specific reading and mathematical competencies. This book offers specific examples and empirical evidence of how integrated science literacy curriculum and teaching in urban primary grade classrooms give students opportunities to learn science and to develop positive images of themselves as scientists. The Integrated Science Literacy Enactments (ISLE) approach builds on multimodal, multidimensional, and dialogically oriented teaching and learning principles. Readers see how, as children engage with texts, material objects, dialogue, ideas, and symbols in their classroom community, they are helped to bridge their own understandings and ways with words and images with those of science. In doing so, they become learners of both science and literacy. The book features both researcher and teacher perspectives. It explores science learning and its intersection with literacy development in schools that educate predominately children of color, many of whom struggle with poverty and have been traditionally underestimated, underserved, and underrated in science classrooms. In all these ways, this volume is a significant contribution to a critically under-researched area of science education.

**Your Curriculum Companion:** Libby Woodfin, Suzanne Nathan Plaut, 2021-02-01 This essential guide to the EL Education K-5 Language Arts Curriculum is one part roadmap to the curriculum, one part orientation to its instructional practices, and one part coach to answer your questions, relieve your stress, and put you and your students on the path to success.
