Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25 Educational

Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools. Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy, curriculum inquiry and pedagogical action. The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming. Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities. The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action. The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society. It should also appeal to those interested in the philosophy of education.

Gender, Protests and Political Change in Africa Awino Okech, 2020-07-03. This book brings together conceptual debates on the impact of youth hood and gender on state building in Africa. It offers contemporary and interdisciplinary analyses on the role of protests as an alternative route for citizens to challenge the ballot box as the only legitimate means of ensuring freedom. Drawing on case studies from seven African countries, the contributors focus on specific political moments in their respective countries to offer insights into how the state-society social contract is contested through informal channels and how political power functions to counteract citizens' voices. These contributions offer a different way of thinking about state building and structural change that goes beyond the system-based approaches that dominate scholarship on democratization and political structures. In effect, it provides a basis for organizers and social movements to consider how to build solidarity beyond influencing government institutions. Chapters 3, 5 and 6 are available.

A Proposal for the Expanded Fruition of Cultural Heritage Sites Carla Ferreyra, 2025-05-06 This book presents a comprehensive methodology integrating analysis, digitization and the preservation of cultural heritage. It investigates three potential UNESCO World Heritage Sites in Italy, Germany and South Africa and employs a blend of documentary research and advanced digital surveying and data processing techniques. The volume shows how these efforts yielded actionable strategies to meet society's evolving demands for surveying, recovery and conservation. The book documents the work behind the overarching objective which was to digitize, analyze, categorize and store all collected data within a BIM framework with the aim of streamlining collaboration, enhancing management efficiency and optimizing processes. It demonstrates the utilization of digital tools in not only amplifying traditional scientific/technological approaches to heritage protection but also its role in reshaping the perception, comprehension and communication of heritage. This fosters the development of more sustainable conservation strategies.

Learning for a Better Future Suzanne Hattingh, 2021-12-31 Various international scholars and associates of the PASCAL Place Social Capital and Learning Regions International Observatory Africa hub under the auspices of the Centre for Local Economic Development (CENLED) based at the University of Johannesburg (UJ) have contributed chapters in this scholarly book. The book aims to demonstrate how a combination of globalisation, pandemics and the impact of innovation and technologies are driving towards a world in which traditional ideas are being challenged. The book carries forward a dual context and relevance to South African social, educational, economic and cultural development and the broader international context and action directed at how lifelong learning for all can be fostered in communities as a foundation for a just, human-centred sustainable world. The distinctive contribution of this book to the production of a local body of knowledge lies in the symbiotic relationships between these objectives so that South Africa could serve as a test case in working towards approaches that have a wider international significance.
