Abd-Elsalam,2022-10-26 Fungal Cell Factories for Sustainable Nanomaterials Productions and Agricultural Applications explores the mycogenic synthesis of many metal nanoparticles including processing processes environmental protection and future perspectives Nanomaterials including silver gold palladium copper zinc selenium titanium dioxide metal sulphide cellulose have been formed by major fungal genes such as mushrooms Fusarium Trichoderma endophytic fungi and yeast in addition to lichens Understanding the exact process involved in the synthesis of nanoparticles and the effects of various factors on the reduction of metal ions can help to improve low cost strategies for the synthesis and extraction of nanoparticles Other sections focus on a new framework for the production of nano antimicrobial the use of myconanoparticles against plant diseases post harvest antibiotics mycotoxin control and plant pests in addition to certain animal pathogens Myconanomaterials are well developed with great potential and promise for advanced diagnostics biosensors precision farming and targeted smart delivery systems Assesses the impact of a variety of copper based nanostructures on agri food sectors addressing the most relevant knowledge gaps Explores the opportunities that myconanotechnology can provide for industrial applications Explains the major challenges of applying myconanotechnology at an industrial scale   ECGBL2014-8th European Conference on Games Based Learning Carsten Busch,2014-11-11   **Participation of Young People in Governance Processes in Africa** Kurebwa, Jeffrey,Dodo, Obadiah,2019-06-28 Active political engagement requires the youth of today to begin their journeys now to be leaders of tomorrow Young individuals are instrumental in providing valuable insight into issues locally as well as on a national and international level Participation of Young People in Governance Processes in Africa examines the role of young peoples involvement in governance processes in Africa and demonstrates how they are engaging in active citizenship There is an intrinsic value in upholding their right to participate in decisions that affect their daily lives and their communities and the content within this publication supports this by focusing on topics such as good citizenship youth empowerment democratic awareness political climate and socio economic development It is designed for researchers academics policymakers government officials and professionals whose interests center on the engagement of youth in active citizenship roles   **Crisis Management, Destination Recovery and Sustainability** James Kennell,Priyakrushna Mohanty,Anukrati Sharma,Azizul Hassan,2022-12-29 The COVID 19 pandemic brought travel to a halt and the global tourism industry has been one of the sectors hit hardest during the pandemic This book looks at how the tourism industry can enhance its resilience and prepare for future crises more effectively The book provides insights into the economic social geopolitical and environmental implications of the COVID 19 pandemic on the tourism and hospitality industries and the responses in diverse international contexts It highlights key concepts and includes cases with real life applications The book also discusses future research directions in a post pandemic scenario This book will be an invaluable resource for practitioners in the areas of tourism and crisis management and for readers to compare and contrast tourism destination recovery and crisis management practices

through different research methodologies and settings **The Guide to COIL Virtual Exchange** Jon Rubin,Sarah Guth,2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange conceived and co edited by one of the originators of this innovative approach to internationalization Jon Rubin COIL the acronym for Collaborative Online International Learning is a central modality of what has come to be known as virtual exchange Since its first iteration in 2002 it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research COIL Virtual Exchange at its most essential is a bi lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and or culturally distinct To launch a COIL VE course the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country Together their students engage and develop joint projects usually over a continuous five to eight week period Compared to the limited number of students worldwide who can engage in study abroad COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development This comprehensive guide covers COIL VE pedagogy provides examples of what takes place in the COIL classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE Additionally the book provides links to the COIL Connect for Virtual Exchange website https coilconnect org which includes an updated directory of organizations an expanding database of faculty and institutions participating in COIL and looking for partners course templates survey data and case studies This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses theoretical foundations guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs **Titles Without Merit** Francis Machingura,Munyaradzi Mawere,2024-05-29 This book examines the controversial issues surrounding the desire for titles both earned and unearned in Zimbabwe and beyond The desire for titles is often associated with the quest for status power class and recognition Unfortunately this desire has resulted in faking

and the problem of distinguishing genuine PhDs from fake ones The unscrupulous quest for fake degrees is referred to in this book as Titlemania or Taitolomania The scramble for titles has not spared community leaders across the divide Of concern is the failure of higher education students to use their earned titles to contribute to the search for solutions to societal problems through national technological development The perspectives of the contributors in this volume provoke debates on the value of doctorates in Africa and Zimbabwe in particular considering that most PhD holders are not using their degrees to contribute to national development production of goods and services and the improvement of societal conditions

  Applying Theories for Information Systems Research Tiko Iyamu,2021-09-26 This book sets out to provide postgraduate researchers with guidance on selecting and applying sociotechnical theories to the study of information systems including how they can be combined to complement each other Until now it has been difficult to source advice on the application of these theories and there has been no single book that combines multiple theories as this does Examining the impacts of technological developments and seeking to understand how humans interact with computers and systems is a dynamic field but can often confuse researchers with the overwhelming number of social theories that are utilised to derive insights Instead the author in this book breaks down some of the most popular theories used to underpin information system research such as activity theory AT actor network theory ANT contingency theory CT diffusion of innovation DOI theory structuration theory ST and the technology acceptance model TAM By doing so this book serves to enable a simpler faster selection of appropriate theories and a more effective and productive application that leads to richer more rigorous research outcomes Written for postgraduates researchers and academics in the fields of information technology and information systems this book provides a valuable resource of sociotechnical research methodologies that will enable and enhance future studies
