accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves both from national or regional agencies and from individual institutions to respond by combining resources either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts for countries as France, Sweden, Romania, Russia, Wales and England and specific cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities either in mergers or alliances with examples from different countries such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland. A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain.

International Education Daniel Ness, Chia-Ling Lin, 2015-03-17 This encyclopedia is the most current and exhaustive reference available on international education. It provides thorough up-to-date coverage of key topics, concepts and issues as well as in-depth studies of approximately 180 national educational systems throughout the world. Articles examine education broadly and at all levels from primary grades through higher education, formal to informal education, country studies to global organizations.

Decolonisation after Democracy Laurence Piper, 2020-05-21 Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge. This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present. Examples of deep-rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward, modern and traditional, and rational and superstitious. In addition, some accounts of positive values like freedom, equality, justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations, deviations or pathologies. In this collection, some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics. It includes new insights about the state, international relations, clientelism, state-society relations and land reform and introduces new ways to engage the colonial library, curriculum reform and the marginality of historically black institutions. Finally, the contributors deal with the decolonial challenge posed by the Fees Must Fall student movements reflecting on issues of revolutionary politics and gender and sexual violence. This book was originally published as a special issue of *Politikon*.

Research Methods for Information Science Research Ngulube, Patrick,2019-12-13 In today s globalized world viable and reliable research is fundamental for the development of information Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science Building on

previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced level students, researchers, and academicians seeking current research on transformative methods of research within information science. Research Anthology on Innovative Research Methodologies and Utilization Across Multiple Disciplines Management Association, Information Resources, 2021-12-30. Research methodology is as old as academia itself. Research methodology shifts in strategy as it crosses different disciplines and theories. This too is true with the shifting landscape of research opportunities and technologies available to global researchers. To achieve the most accurate and substantial research, it is important to be knowledgeable of emerging research methodologies. The Research Anthology on Innovative Research Methodologies and Utilization Across Multiple Disciplines discusses the most recent global research innovations made across multiple fields. This anthology further discusses how these research methodologies can be applied to a variety of specific fields. Covering topics such as creative thinking, qualitative research, and the research method landscape, this book is essential for students and faculty of higher education, scientists, researchers, sociologists, computer scientists, and academicians. Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions Ngulube, Patrick, 2019-01-11. Memory institutions such as archives, libraries, and museums collect, arrange, describe, and preserve their collections and holdings in order to make them accessible to the community. However, these institutions remain underutilized and are struggling to raise awareness of their existence and attract users and funders. The Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions is a collection of innovative research on emerging strategies such as advocacy, outreach, marketing, and public programming to promote memory institutions and engage the community. While highlighting topics including customer service, solutions, social media, and collection development strategies, this book is ideally designed for heritage management and information professionals, curators, museum management, archival specialists, librarians, policymakers, researchers, and academicians. Trends in Manufacturing and Engineering Management S. Vijayan, Nachiappan Subramanian, K. Sankaranarayanan, 2020-08-19.
