Monroe, North Carolina, Turning Point in American History Conrad J. Lynn, 1962 *Writings on American History*, 1926

Food and Drink in American History Andrew F. Smith, 2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants. The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences, eating habits, and food culture are intrinsically tied to our society and history. This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents. Never before has there been a reference work that coalesces this diverse range of information into a single set. The entries in this set provide information that will transform any American history research project into an engaging learning experience. Examples include explanations of how tuna fish became a staple food product for Americans, how the canning industry emerged from the Civil War, the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages, and how taxation on beverages like tea, rum, and whisky set off important political rebellions in U.S. history.

Public Choice Analyses of American Economic History Joshua Hall, Marcus Witcher, 2018-10-04 This book, the second of two volumes, looks at episodes in American economic history from a public choice perspective. Each chapter discusses citizens' special interests and government officials responding to economic incentives in both markets and politics. In doing so, the book provides fresh insights into important periods of American history from the First Nationalist Movement of 1783 to the perpetual renewal of the Federal Reserve in 1927. This volume features the work of prominent economic historians such as Hugh Rockoff, well-known public choice scholars such as Joshua Hall and J. R. Clark, and younger scholars such as Marcus Witcher and Zachary Gocenour. This book will be useful for researchers and students interested in economics, history, political science, economic history, public choice, and political economy.
