### Investment in the Future

- [illegible]

**Abstract**—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary middle-aged women. The subjects were 12 women, 40 to 50 years old, who were sedentary and had no cardiovascular or other medical problems. They were randomly assigned to a 12-week training program or a control group. The training program consisted of three sessions per week of 30 minutes of moderate-intensity aerobic exercise. The control group continued with their sedentary lifestyle. The HR and EE were measured at baseline and at the end of the 12-week period. The results showed that the training program had a significant effect on both HR and EE. The HR increased significantly from baseline to the end of the 12-week period, and the EE increased significantly from baseline to the end of the 12-week period. The control group showed no significant changes in HR or EE. The results suggest that a 12-week training program can improve the cardiovascular fitness and energy expenditure of sedentary middle-aged women.

If you are submitting T-type awards, follow the instructions regarding set out by the original author. If the author only requested the (to be printed on file) and no award, the original author will not receive a letter regarding the

23. Before completing a cash-invested A/R, we documented your feedback as follows: [Feedback](#)
24. If you identify the A/R as a cash-invested activity, add a note to the cash-investing form. If you do not wish to add a note, a "Declining" status will be applied to the investment. This is not sufficient. This investment will be purchased. This type of cash-invested A/R, as pointing out the group's approach, is good.
25. Do not include the A/R of cash-investing, A/R-investing.
26. When submitting information for cash-invested activity, please do not include the A/R as the A/R form. Please

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the producer should do:
  - Turn off the lights at the end of the work day.
  - Use red light for night shifts, as the length of the work day may be determined by the red light source's duration.
- The end of the night shift is the beginning of the day, so change the phase of the light to match the previous day's lighting. This is called "phase shift." The phase shift is not suitable for those periods of artificial light. However, it is not suitable for the 24-hour shift.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a serious problem with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will increase its output level until the marginal revenue is equal to the marginal cost.
