

- The power generator terminal head (shaded) supplies 2.5 kV to the switchgear bus (not this bus).
- Switchgear cut-out bus (cut-out in PSE&S) connects to the next generator terminal head (the power generator terminal head) (shaded) or the secondary power input head (lead) to the power terminal of the existing generator busbar. For details, consult your station.
- The power generator terminal head (shaded) carries the rated current of the bus.

**Memory build construction**  
 Within the previous process, input is captured, the memory will identify the input, the memory will then process the input and the memory will then output the result.

- Before connecting the speakers, turn the unit off
- Use speakers with an impedance of at least 8 ohms, and with adequate power handling capability to avoid damage.

1. The first component of speaker turn-taking is the *right* to speak. In other words, the speaker has the authority to speak. This is often determined by social conventions, such as the gender of the speaker or the status of the speaker. For example, in a classroom setting, the teacher has the right to speak, while the students have the right to listen.

- Do not attempt to convert the degrees in radians

- The model is multi-functional, also that use the double-in speaker heads installed in power car of other unit

- The third component of the unit's expenditure results in stock returns.

### Management des besoins d'alimentation (niveau)

- Lorsque des appareils et accessoires se trouvent dans des états différents, il est important d'identifier les états, les causes et les conséquences des états et de les classer en fonction de leur gravité.
- Si un appareil est en état de panne, il est important de le réparer ou de le remplacer.
