## **LCSW Exam Questions With Correct Answers 2023**

**Id - Answer** present at birth, this structure consists of the individual's unconscious instinctual drive/needs (the source of all psychic energy). The id seeks immediate gratification of its needs to avoid tension. Reflex actions (blinking, sneezing) and primary process thinking (dreaming) are the tension reducing actions of the id. The id, therefore, is operating on the pleasure principle.

**Ego - Answer** developing at about six months of age, the ego responds to the id's inability to gratify all of its needs. The ego defers gratification until an appropriate object is available in reality. The ego employs secondary process thinking (perception, sensation, memory, and logical thinking). Therefore, the ego operates on the reality principle. The ego also acts as a mediator between the id and the superego (when it develops).

**Superego - Answer** somewhere between age four and five, the child develops the superego. The superego represents an internalization of societal mores. Behaviors that are rewarded become a part of the ego ideal. Punishable behaviors are incorporated into the conscience. The superego also tries to permanently block the id's socially-unacceptable drives.

**Psychoanalytic Psychotherapy - Answer** is the hypotheses and treatment applications about human personality and its development as proposed by Sigmund Freud (with many elaborations and modifications by subsequent theorists and analysts). Especially influential between 1940 and 1965. Freud posited that two separate, yet, interrelated theories comprised personality. Thus, he developed a Personality Theory based on the Id, Ego and Superego.

**Psychoanalytic Techniques - Answer** The Techniques:

- free association
- transference/counter-transference
- analyzing/interpreting resistance
- ego analysis
- dream interpretation
