Pitkin Review Fall 2014:

Pitkin Review Fall 2014 Goddard College MFA Students, Rose Marie Sabangan, 2014-12-11 The Pitkin Review is a literary journal produced by writers who are currently enrolled in the MFA Creative Writing program at one of Goddard College's two campuses. The Pitkin Review is self-supporting, staffed by the MFA candidates and funded solely by the sales of copies of the publication. The publication offers writers experience in submitting to and producing every aspect of a literary journal and also serves as a showcase for exceptional student writing. Published bi-annually in the spring and fall, The Pitkin Review is a collaborative community of editors, writers, and graphic artists who volunteer their time and talents to generate a high-quality publication.

Philosophy for Everyone Matthew Chrisman, Duncan Pritchard, Guy Fletcher, Elinor Mason, Jane Suilin Lavelle, Michela Massimi, Alasdair Richmond, Dave Ward, 2016-07-15 Philosophy for Everyone begins by explaining what philosophy is before exploring the questions and issues at the foundation of this important subject. Key topics in this new edition and their areas of focus include: Moral philosophy: the nature of our moral judgments and reactions, whether they aim at some objective moral truth or are mere personal or cultural preferences, and the possibility of moral responsibility given the sorts of things that cause behavior. Political philosophy: fundamental questions about the nature of states and their relationship to the citizens within those states. Epistemology: what our knowledge of the world and ourselves consists in and how we come to have it, and whether we should form beliefs by trusting what other people tell us. Philosophy of mind: what it means for something to have a mind and how minds should be understood and explained. Philosophy of science: foundational conceptual issues in scientific research and practice, such as whether scientific theories are true and Metaphysics: fundamental questions about the nature of reality, such as whether we have free will or whether time travel is possible. This book is designed to be used in conjunction with the free Introduction to Philosophy MOOC, massive open online course created by the University of Edinburgh's Eidyn research centre and hosted by the Coursera platform (www.coursera.org). This course is also highly recommended for anyone looking for a short overview of this fascinating discipline.

Mapping and Measuring Deliberation André Bächtiger, John Parkinson, 2019-01-03 Deliberative democracy has challenged two widely accepted nostrums about democratic politics: that people lack the capacities for effective self-government and that democratic procedures are arbitrary and do not reflect popular will. Indeed, that the idea of popular will is itself illusory. On the contrary, deliberative democrats have shown that people are capable of being sophisticated creative problem solvers given the right opportunities in the right kinds of democratic institutions. But deliberative empirical research has its own problems. In this book, two leading deliberative scholars review decades of that research and reveal three important issues. First, the concept deliberation has been inflated so much as to lose empirical bite. Second, deliberation has been equated with entire processes of which it is just one feature. And third, such processes are confused with democracy in a deliberative mode more generally. In other words, studies frequently apply micro-level tools and concepts to make macro and

meso level judgements and vice versa Instead B chtiger and Parkinson argue that deliberation must be understood as contingent performative and distributed They argue that deliberation needs to be disentangled from other communicative modes that appropriate tools need to be deployed at the right level of analysis and that scholars need to be clear about whether they are making additive judgements or summative ones They then apply that understanding to set out a new agenda and new empirical tools for deliberative empirical scholarship at the micro meso and macro levels

Constitutional Law, Religion and Equal Liberty Azin Tadjini, 2019-09-19 During the 20th century many countries embarked on a process of constitutional secularization by which the role of religion gradually became limited Yet by the late 20th century and increasingly following the end of the Cold War this development began to be challenged This book examines the return of religion in constitutions through the concept of constitutional de secularization It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy

makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights

The Health of

Newcomers Patricia Illingworth, Wendy E. Parmet, 2017-01-24 Immigration and health care are hotly debated and contentious issues Policies that relate to both issues to the health of newcomers often reflect misimpressions about immigrants and their impact on health care systems Despite the fact that immigrants are typically younger and healthier than natives and that many immigrants play a vital role as care givers in their new lands native citizens are often reluctant to extend basic health care to immigrants choosing instead to let them suffer to let them die prematurely or to expedite their return to their home lands Likewise many nations turn against immigrants when epidemics such as Ebola strike under the false belief that native populations can be kept well only if immigrants are kept out In *The Health of Newcomers* Patricia Illingworth and Wendy E Parmet demonstrate how shortsighted and dangerous it is to craft health policy on the basis of ethnocentrism and xenophobia Because health is a global public good and people benefit from the health of neighbor and stranger alike it is in everyone s interest to ensure the health of all Drawing on rigorous legal and ethical arguments and empirical studies as well as deeply personal stories of immigrant struggles Illingworth and Parmet make the compelling case that global phenomena such as poverty the medical brain drain organ tourism and climate change ought to inform the health policy we craft for newcomers and natives alike

Earned Citizenship Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country *Earned Citizenship* argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole *Earned Citizenship* provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

The Importance of Campaign Promises Tabitha Bonilla, 2022-02-03 Campaign promises are a cornerstone of representative democracy Candidates make promises to signal to voters their intentions in office and voters evaluate candidates based on those promises This study unpacks the theorized pathway regarding campaign promises not whether promises are kept but what purpose promises serve what they signal and how they affect voter decision making The author explores the pathways and conditions influencing promises and finds that promises tend to have a polarizing effect on voters opinions of politicians attracting similarly positioned voters and strongly repelling voters who disagree with a candidate s position In addition voters perceive promise breakers as less honest and less likely to follow through than candidates who more weakly took the same position With a wealth of data and fascinating case studies this book is full of important insights into electoral psychology and the study of promises campaigning and representation

The Renaissance of Feeling Kirk Essary, 2024-01-11 Offering a re reading of Erasmus s works this book shows that emotion and affectivity were central to his writings It argues that Erasmus s conception of emotion was highly complex and richly diverse by tracing how the Dutch humanist writes about emotion not only from different perspectives theological philosophical literary rhetorical medical but also in different genres In doing so this book suggests Erasmus provided a distinctive if not unique Christian humanist emotional style Demonstrating that Erasmus consulted multiple intellectual traditions and previous works in his thoughts on affectivity The Renaissance of Feeling sheds light on how understanding emotions in late medieval and early modern Europe

was a multi disciplinary affair for humanist scholars It argues that the rediscovery and proliferation ancient texts during the so called renaissance resulted in shifting perspectives on how emotions were described and understood and on their significance for Christian thought and practice The book shows how the very availability of source material coupled with humanists eagerness to engage with multiple intellectual traditions gave rise to new understandings of feeling in the 16th century Essay shows how Erasmus provides the clearest example of such an intellectual inheritance by examining his writings about emotion across much of his vast corpus including literary and rhetorical works theological treatises textual commentaries religious disputations and letters Considering the rich and diverse ways that Erasmus wrote about emotions and affectivity this book provides a new lens to study his works and sheds light on how emotions were understood in early modern Europe
