**The Art of Teaching Primary School Science** Vaille Dawson, Grady Venville, 2020-07-16 Children have an innate curiosity about the natural world that makes teaching science a rewarding experience. However, teaching science is an art that requires a unique combination of knowledge and skills to make the most of students' interest and foster their understanding. With contributions from leading educators, *The Art of Teaching Primary Science* addresses the fundamental issues in teaching science in primary and early childhood years. Reflecting current research in science education, *The Art of Teaching Primary Science* covers the following areas: the theoretical underpinnings of science education and curriculum; effective science teaching practice; planning teaching strategies; investigations; resources and assessment; key issues including scientific literacy; integrating science and technology; and activities outside the classroom. **Teaching Science**, 2006

**Educating for Sustainability in Primary Schools** Neil Taylor, Frances Quinn, Chris Eames, 2015-06-17 Education for Sustainability is a key priority in today's schools as our society seeks to find a balance between environmental, social, cultural, political, and economic imperatives that affect our future. As young children will become the next generation of adults, it is vital that they are educated about sustainability issues so that they can learn to make informed decisions and take positive action for a sustainable world. Teachers are ideally placed to educate for sustainability issues and indeed have a responsibility to do so. However, they often lack support and experience in this area, and constraints of current curriculum priorities can inhibit Education for Sustainability being taught effectively in many classrooms. *Educating for Sustainability in Primary Schools: Teaching for the Future* addresses this problem by showing how Education for Sustainability can be developed within and across all areas of the primary curriculum in the Australian and New Zealand contexts. The book provides a range of educational approaches and examples of activities to support teachers in addressing national requirements for teaching the major primary curriculum learning areas while simultaneously educating for sustainability. This integrative approach to primary education can promote knowledge of positive attitudes towards and suitable action for sustainability in relevant, meaningful, enjoyable, and creative ways. This book is a valuable resource for all primary teachers who wish to make a real difference to educating children for the future. Plants in Action, 2012 The *Plants in Action* unit is an ideal way to link science with literacy in the classroom. Students' beliefs about flowering plants will be challenged as they work through hands-on activities.
