Quoquab, Adriana Md Rizal, Maizaitulaidawati Md Husin, Jihad Mohammad, Arif Hassan, 2018-02-01 This book is ideal for teaching subjects related to marketing management, entrepreneurship, and business ethics. It can be used as the tool to teach students/trainers in advanced undergraduate and MBA/MSc classes. It is widely acknowledged that only theoretical discussion does not provide the comprehensive understanding about the business decisions that are taken by the managers and/or other parties involved. And thus, use of cases are common in business studies, which not only provides students understanding about the practical aspects of the concepts that are being taught in text books but also it introduces students with several aspects of the real-life dilemma complexities and challenges while working in a business environment. This book contains teaching notes of the book titled *A Handbook of Malaysian Cases: Contemporary Issues in Marketing Management* in which eleven local cases were presented. The teaching notes serve as a guide for instructors who intend to utilize these cases in their classes. Each teaching note includes a brief synopsis of the case, learning objectives, the case's target audience, information about the case, leading strategies, relevant concepts, subjects, suggested assignment questions, and their corresponding suggested answers. In this way, the instructors will have greater understanding about the use and applicability of the said eleven cases. It is hoped that university lecturers/practitioners and students who are undertaking courses in business studies will benefit from this book. **An Introductory Guide to EC Competition Law and Practice** Valentine

Oxford Handbook of the Science of Science Communication Kathleen Hall Jamieson, Dan Kahan, Dietram A. Scheufele, 2017-05-17 The proposal to vaccinate adolescent girls against the human papilloma virus ignited political controversy as did the advent of fracking and a host of other emerging technologies. These disputes attest to the persistent gap between expert and public perceptions. Complicating the communication of sound science and the debates that surround the societal applications of that science is a changing media environment in which misinformation can elicit belief without corrective context and likeminded individuals are prone to seek ideologically comforting information within their own self-constructed media enclaves. Drawing on the expertise of leading science communication scholars from six countries, The Oxford Handbook of the Science of Science Communication not only charts the media landscape from news and entertainment to blogs and films but also examines the powers and perils of human biases from the disposition to seek confirming evidence to the inclination to overweight endpoints in a trend line. In the process it draws together the best available social science on ways to communicate science while also minimizing the pernicious effects of human bias. The Handbook adds case studies exploring instances in which communication undercut or facilitated the access to scientific evidence. The range of topics addressed is wide from genetically engineered organisms and nanotechnology to vaccination controversies and climate change. Also unique to this book is a focus on the complexities of involving the public in decision making about the uses of science, the regulations that should govern its application and the ethical boundaries within which science should operate. The Handbook is an invaluable resource for researchers in the communication fields particularly in science and health communication as well as to scholars involved in research on scientific topics susceptible to distortion in
