Baaske, 2022-05-06 Arguing is a fundamental human activity it is a process of making sense of the world and negotiating understandings with others Arguing can be and often is healthy for both relationships and societies The values of the community are shaped through people sharing their opinions offering reasons in support of their beliefs and deliberating Hollihan and Baaske present techniques for effective analysis logical reasoning and socially constructive argumentation They illustrate their discussions of theory and practice with multiple engaging examples The book focuses on narrative argument as a story backed by evidence to evaluate courses of action or to resolve conflicts A chapter on visual argumentation highlights the power of visual elements in arguments Effective arguing requires a sensitivity to the demands of different argumentative contexts Readers will become familiar with the elements of argument essential for politics the law debate business and relationships Narrative arguments are rational arguments Learning about the narrative reasoning

process helps us tell more convincing credible and compassionate stories and to become better critics of the stories we hear

### **Relational Responses to Trauma in Twenty-First-Century French and Spanish Women's Writing** Hannie

Lawlor,2024-08-28 Relational Responses to Trauma in Twenty First Century French and Spanish Women s Writing offers new insight into what it means to write relational lives It broadens the parameters of existing discussions in terms of geography as well as genre drawing together two literatures whose prominence in life writing theory to date could hardly be more different while French women s writing has long been at the centre of international discussions of autobiography the relative invisibility of Spanish women s writing remains striking The dialogue that thus underpins this study between diverse twenty first century case studies and broader approaches to life writing shines a light on what is gained from inviting different voices into the discussion These narrative projects challenge longstanding critical assumptions in autobiography studies and trauma theory about how writers can and should represent the multiple perspectives that are at the heart of

intergenerational stories In exploring the narrative solutions that these texts propose in response to the ethical questions they navigate this book shows that writing relational lives rests on far more than the mere recounting of a shared history Relating in these texts it proposes is an act embedded in the telling of the story It is a mode of testifying together to traumatic experience one that reveals a powerful preoccupation in contemporary women s life writing practice with making more audible the many voices and versions that go unheard

*The Heart in Rheumatic, Autoimmune and Inflammatory Diseases* Udi Nussinovitch,2017-02-10 The prevalence of autoimmune diseases and rheumatic conditions is constantly increasing Autoimmune diseases affect approximately 7 10% of the population of the United States while more than 50 000 000 American adults suffer from some type of arthritis The Heart in Rheumatic Autoimmune and Inflammatory Diseases examines the complex mechanisms relating to cardiac diseases from a pathophysiological and clinical point of view Autoimmune rheumatic diseases can affect the coronary vessels myocardium pericardium heart valves and the conduction system The diagnosis of these unique cardiac complications necessitates medical awareness and a high index of suspicion Increased risk of advanced atherosclerosis plays a pivotal role in the development of cardiac diseases in systemic rheumatic and autoimmune illnesses Yet other complex immune mediated mechanisms may contribute to the pathogenesis Patients optimal care requires coordination between the primary caregiver the rheumatologist immunologist and cardiologist Screening for cardiovascular risk factors recognition of high risk patients and identification of subclinical cardiac conditions are of great importance Moreover regulation of inflammation as well as abnormal immune responses and the initiation of early treatments should be the focus of patient management A continuous attempt to identify novel therapeutic targets and change the natural history of the underlying disease and its cardiac manifestations is in progress The book aims at providing the readers with a state of the art collection of up to date information regarding clinically important topics based on experts perspectives This book was a result of an extended coordinated collaboration of one hundred and fifty four distinguished

scientists from thirty one countries around the globe A review of common as well as unusual yet clinically significant medical cardiac complications of prevalent rheumatic autoimmune and inflammatory diseases Focuses on aspects of pathophysiological processes clinical presentations screening tests prognostic implications and novel therapeutic approaches Presents an up to date level of evidence and strengths of recommendations for suggested therapies and reviews all randomized clinical trials meta analyses and other supporting published clinical findings

**The Palgrave Handbook of Artistic and Cultural Responses to War since 1914** Martin Kerby, Margaret Baguley, Janet McDonald, 2018-12-05 This handbook explores a diverse range of artistic and cultural responses to modern conflict from Mons in the First World War to Kabul in the twenty first century With over thirty chapters from an international range of contributors ranging from the UK to the US and Australia and working across history art literature and media it offers a significant interdisciplinary contribution to the study of modern war and our artistic and cultural responses to it The handbook is divided into three parts The first part explores how communities and individuals responded to loss and grief by using art and culture to assimilate the experience as an act of survival and resilience The second part explores how conflict exerts a powerful influence on the expression and formation of both individual group racial cultural and national identities and the role played by art literature and education in this process The third part moves beyond the actual experience of conflict and its connection with issues of identity to explore how individuals and society have made use of art and culture to commemorate the war In this way it offers a unique breadth of vision and perspective to explore how conflicts have been both represented and remembered since the early twentieth century

**Small Farmers for Global Food Security** Thomas Reuter, Graeme MacRae, 2024-04-05 Food systems in Indonesia and worldwide have experienced major transformations in the wake of agricultural modernisation Once intact eco systems have declined dramatically along with human diets long term food security and social cohesion Using long term ethnographic research we documented this loss of traditional food systems in Java Bali East Timor and India but also a recent revival and reinvention of sustainable production methods and community based distribution systems A growing movement of small farmers now reject the dominant paradigm of aggressive capitalist development and are re creating food systems based on moral ecology a new concept we introduce to characterise food systems that regenerate the natural environment and serve the common good rather than maximise profit Small farmers like these already feed two thirds of humanity using only a third of agricultural land With proper support we argue they could feed the entire world using sustainable and socially responsible approaches to eradicate world hunger

*Green Utopias* Lisa Garforth, 2018-03-15 Environmentalism has relentlessly warned about the dire consequences of abusing and exploiting the planet s natural resources imagining future wastelands of ecological depletion and social chaos But it has also generated rich new ideas about how humans might live better with nature Green Utopias explores these ideas of environmental hope in the post war period from the environmental crisis to the end of nature Using a broad definition of Utopia as it exists in Western policy theory and literature Lisa Garforth explains how its developing entanglement with popular culture and mainstream politics has shaped successive green future visions and initiatives In the face of apocalyptic despairing or indifferent responses to contemporary ecological dilemmas utopias and the utopian method seem more necessary than ever This distinctive reading of green political thought and culture will appeal across the social sciences and humanities to all interested in why green utopias continue to matter in the cultivation of ecological values and the emergence of new forms of human and non human well being

Invisible Digital Aylish Wood, 2024-01-11 Invisible Digital helps us makes sense of something we cannot see by presenting an innovative approach to digital images and digital culture At its heart is a novel method for exploring software used in the creation of moving images as markers of converging cultural organizational and technological influences The three main case studies of Invisible Digital are the animated feature Moana 2016 and the computer games No Man s Sky 2016 and Everything 2017 All three were created using procedural techniques simulation software for Moana and procedural content generation for No Man s Sky and Everything Production culture disclosures associated with procedural techniques often emphasize the influences of automated systems and their algorithms making them ideal for a study that interrogates digital processes The approach of Invisible Digital is informed by relational theories and the concept of entanglement based on materialist perspectives combined with insights from work that more explicitly

interrogates algorithms and algorithmic culture Aylish Wood employs the notion of assemblages to introduce the concept of material cultural narratives Using this conceptual framework she draws out material cultural narratives for each case study to demonstrate what they reveal about software and digital culture These analyses of software provide a widely applicable method through which moving image studies can contribute more fully to the wider and growing debates about algorithmic culture
