between our energy and that of God is simply the enormous difference in order of magnitude when comparing God's energy to ours. The behavior of this energy mirrors the equations brilliantly originated and described by Albert Einstein with two exceptions: the mass m referenced in Einstein's famous equation $E = mc^2$ is a special Mass M originating in God's energy particles and God's and our soul energy travels at one million times the speed of light c or 186 billion miles per second. In fact, this Mass is the source of the independent intelligence and sensory properties found in the soul of all human brains.

Putting God Into Einstein's Equations Energy of the Soul is a provocative and compelling book that weaves together empirical scientific observation, academic research, and theoretical and theological considerations bolstered by revelatory first-hand testimony bearing witness to the existence of the Divine soul in both the physical and spirit worlds. Contained in the pages of **Putting God Into Einstein's Equations** are moving personal reflections on the author's life experiences from the thrill of discovering one's true soul mate to both traumatic and joyous events like a descent into bipolar depression, Divine miracles, and the pain and loss associated with the death of a loved one. Equally explored and discussed are practical first-hand experiential techniques for hypnotic spiritual world regression and directing spiritual energy and using light to alleviate negative forces. Above all else, **Putting God Into Einstein's Equations** seeks to advance an awareness and comprehension of God drawing upon points of reference as diverse as Qigong and yoga to the word of rabbinical scholars.
