Fiscal Resilience Building: Insights from a New Tax Revenue Diversification Index Rasmané Ouedraogo,Rene Tapsoba,Moussé Sow,Ali Compaoré,2020-06-12 Does the reliance on diversified tax structure enhance resilience to fiscal risks This paper gives an answer to this question by proposing a new cross country tax revenue diversification index RDI The RDI builds on the Theil index and unlike the few existing tax diversification indices which are constructed only at the state

level for the US is computed at the national level covering a broad panel of 127 countries over the period 2000-15. We find suggestive evidence that tax revenue diversification reduces tax revenue volatility thus bringing to the data long held views about the prominence of tax revenue diversification for fiscal resilience strengthening. While exploring the drivers of the RDI we find that tax revenue diversification is not just a reflection of economic diversification but also an outcome of macroeconomic, political and institutional factors. Interestingly a non monotone relationship is also at play between the RDI and economic development with countries' portfolio of tax sources getting more diversified as their economy develops until a tipping point where richer countries start finding it harder to diversify further their tax revenue sources. **Rwanda**

International Monetary Fund, Statistics Dept., 2018-03-28. This Technical Assistance Report discusses the findings and recommendations made by the IMF mission to assist authorities in Rwanda in aligning the compilation and dissemination of government finance statistics GFS in accordance with the Government Finance Statistics Manual 2014. It was recommended that the Ministry of Finance MINECOFIN should officially assign GFS compilation duties to a specific subset of its staff. The mission believes that it is important for the MINECOFIN to make a permanent assignment of GFS compilation and dissemination duties so that the work can evolve systematically. In the mission's view the Macroeconomic Policy Unit appears to be well placed to perform this task. However the unit should be allocated appropriate resources to take on the responsibility.
