Apollo's Eye Denis Cosgrove,2003-10-17 This award winning science history explores our evolving image of the globe and how it has shifted our relationship to the world Long before we had the ability to photograph the earth from space to see our planet as it would be seen by the Greek god Apollo images of the earth as a globe had captured popular imagination In *Apollo's Eye* geographer Denis Cosgrove examines the historical implications for the West of conceiving and representing the earth as a globe a unified spherical body Cosgrove traces how ideas of globalism and globalization have shifted historically in relation to changing images of the earth from antiquity to the Space Age He connects the evolving image of a unified globe to politically powerful conceptions of human unity Winner of the Association of American Publishers Professional and Scholarly Publishing Award in Geography Earth Sciences

The Poetics of Reverie Gaston Bachelard,1971-06-01 In this his last significant work an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world positing the notion of reverie as its most dynamic point of reference In his earlier book *The Poetics of Space* Bachelard considered several kinds of praiseworthy space conducive to the flow of poetic imagery In *Poetics of Reverie* he considers the absolute origins of that imagery language sexuality childhood the Cartesian ego and the universe Approaching the psychology of wonder from the phenomenological viewpoint Bachelard demonstrates the aurgetative potential of all that awareness Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which poetry puts on the right track the track of expanding consciousness

Gaston Bachelard, Revised and Updated Roch C. Smith,2016-06-03 Comprehensive overview of the entire spectrum of works by one of twentieth century France's most original thinkers Gaston Bachelard one of twentieth century France's most original thinkers is known by English language readers primarily as the author of *The Poetics of Space* and several other books on the imagination but he made significant contributions to the philosophy and history of science In this book Roch C Smith provides a comprehensive introduction to Bachelard's work demonstrating how his writings on the literary imagination can be better understood in the context of his exploration of how knowledge works in science After an overview of Bachelard's writings on the scientific mind as it was transformed by relativity quantum physics and modern chemistry Smith examines Bachelard's works on the imagination in light of particular intellectual values Bachelard derived from science His trajectory from science to a specifically literary imagination is traced by recognizing his concern with what science teaches about how we know and his increasing preoccupation with questions of being when dealing with poetic imagery Smith also explores the material and dynamic imagination associated with the four elements fire water air and earth and the phenomenology of

creative imagination in Bachelard's Poetics of Space his Poetics of Reverie and in the fragments of Poetics of Fire

Adventures in Phenomenology Eileen Rizo-Patron, Edward S. Casey, Jason M. Wirth, 2017-07-31 Like Schelling before him and Deleuze and Guattari after him Gaston Bachelard made major philosophical contributions to the advancement of science and the arts In addition to being a mathematician and epistemologist whose influential work in the philosophy of science is still being absorbed Bachelard was also one of the most innovative thinkers on poetic creativity and its ethical implications His approaches to literature and the arts by way of elemental reverie awakened long buried modes of thinking that have inspired literary critics depth psychologists poets and artists alike Bachelard's extraordinary body of work unduly neglected by the English language reception of continental philosophy in recent decades exhibits a capacity to speak to the full complexity and wider reaches of human thinking The essays in this volume analyze Bachelard as a phenomenological thinker and situate his thought within the Western tradition Considering his work alongside that of Schelling Husserl Bergson Buber Heidegger Merleau Ponty Gadamer Deleuze and Nancy this collection highlights some of Bachelard's most provocative proposals on questions of ontology hermeneutics ethics environmental politics spirituality and the possibilities they offer for productive transformations of self and world Black South African Autobiography After Deleuze Kgomo M. Masemola, 2017-05-01 In Black South African Autobiography After Deleuze Belonging and Becoming in Self Testimony Kgomo Michael Masemola uses Gilles Deleuze's theories of immanence and deterritorialization to explore South African autobiography as both the site and the limit of intertextual cultural memory Detailing the intertextual turn that is commensurate with belonging to the African world and its diasporic reaches through the Black Atlantic among others this book covers autobiographies from Peter Abrahams to Es'kia Mphahlele from Ellen Kuzwayo to Nelson Mandela It proceeds further to reveal wider dimensions of angst and belonging that attend becoming through transcultural memory Kgomo Michael Masemola successfully marshalls Deleuzian theories in a sophisticated re-reading that makes clear the autobiographers epistemic access to worlds beyond South Africa *Sotheran's Price Current of Literature*, 1902
