

# REVERSE SCAVENGER HUNT

## Objective

Be a Recycling Superstar and know what is and is not recyclable.

## What you will need

- 1 The list of what is and is not recyclable in your program.
- 2 Slips of paper with names of things that come in recyclable packages and things that are not recyclable items.  
For example:

• bottled water	• magazine	• toy
• milk	• scrap paper	• shirt
• soup	• shipping box	• basket
• cereal	• shampoo	• book
• chips	• dish detergent	• battery
• snack bar	• laundry detergent	• cell phone or tablet
• soda	• paper towels	
• juice	• laundry detergent	
- 3 Make a master list of yes/no items. Create and fold slips with names of items and drop them into a bowl.
- 4 **OPTION:** Use a tablet to share the house diagram on the following page, print a diagram and complete the exercise on paper, or go around your house together. Up your game and write clues for each item.

To protect the planet  
and keep it clean,  
we must search the house  
for items seen and unseen.

Where will you find it?  
Where should it go?  
When you finish this challenge,  
you will certainly know!

Everything we buy and bring into  
our home must someday go  
somewhere else. Where should it go?

Ask your superstar(s) to tell you what they know about recycling. Can they list some things that do and don't belong in recycling?

With your master list ready, have each player reach into the bowl and pull a slip and read the clue.

Either have players bring you the item or mark on the house diagram where that item might be when it is either empty, outgrown or ready to pass on.

Discuss what path the item should take.

**REMEMBER** Recyclables must be **EMPTY** and **DRY**.

Visit [it'sallaboutyourecycle.org](http://it'sallaboutyourecycle.org)  
to see how your  
recycling adds up!

**Investigating Water With Young**

**Children (Ages 3-8)** Beth Dykstra Van Meeteren, 2023 Water is a meaningful context for children to engage in inquiry and acquire and use science and engineering practices such as developing spatial thinking and early concepts of water dynamics. This book shows teachers how to engage children with opportunities to engineer water movement through pouring and filling containers of various kinds and shapes, observing how water interacts with surfaces in large and small amounts, exploring how water can be moved and using water to move objects. These experiences build a foundation that will support children's more complex study of this phenomena in later schooling as well as encourage interest in STEM fields. The text provides guidance for arranging the physical, intellectual, social, emotional, and promotional environments of the early childhood classroom for integrating literacy learning and for building essential partnerships with administrators and families to enhance STEM learning for our youngest learners. Book Features: Introduces WaterWorks, an integrative STEM experience developed by young children, their teachers, and early childhood researchers; Describes an approach that engages children in doing science and engineering rather than teaching children about these fields; Offers children the opportunity to engage in STEM experiences every day in their classrooms alongside literacy learning; Illustrates ways to plan and use over ten types of engineering experiences appropriate for children ages 3-8; Includes guidance for documenting children's learning over time; Aligns to the Early Learning Outcomes Framework and the Next Generation Science Standards. Contributors: Allison Barness, Shelly L. Counsell, Lawrence Escalada, Judith Finkelstein, Linda Fitzgerald, Sherri Peterson, Jull Uhlenberg, and Wendy Miller. Praise for the STEM for Our Youngest Learners Series: This series is an important addition to a very limited field of guides for teaching STEM to young learners. While activity books abound, this series, with its basis in constructivism and its use of an inquiry-based teaching model, guides teachers in creating in-depth experiences for children to examine the natural world while building their critical thinking skills and deepening their curiosity about and interest in the world around them. Karen Worth, consultant in science education, early childhood and elementary years.

**The Sam Gunn Omnibus** Ben Bova, 2009-04-14 THE IRREPRESSIBLE SAM GUNN A hero without peer or scruples Sam Gunn has a nose for trouble, money and women, though not necessarily in that order. A man with the ego and stature of a Napoleon, the business acumen of a P. T. Barnum, and the raging hormones of a teenage boy, Sam is the finest astronaut NASA ever trained and dumped. But more than money, more than women, Sam Gunn loves justice. And he really does love money and women. Whether he's suing the Pope, helping twin sisters entangled in the virtual sex trade, or on trial for his life on charges of interplanetary genocide, you can be sure of one thing: this is one space jockey who'll meet every challenge with a smile on his lips, an ace up his sleeve, and a weapon in his pocket. Now, for the first time between covers, Hugo winner Ben Bova presents all the tales of Sam Gunn to date, including three never before collected in book form. Here is the entire chronicle of Sam Gunn, trailblazer and scoundrel, as he scams his way from one end of the Solar System to the other, giving bold new meaning to the term venture capitalist.
