,1981-07 *Intelligent Unmanned Ground Vehicles* Martial H. Hebert, Charles E. Thorpe, Anthony Stentz, 2012-12-06
Intelligent Unmanned Ground Vehicles describes the technology developed and the results obtained by the Carnegie Mellon
Robotics Institute in the course of the DARPA Unmanned Ground Vehicle UGV project The goal of this work was to equip off
road vehicles with computer controlled unmanned driving capabilities The book describes contributions in the area of
mobility for UGVs including tools for assembling complex autonomous mobility systems on road and off road navigation
sensing techniques and route planning algorithms In addition to basic mobility technology the book covers a number of
integrated systems demonstrated in the field in realistic scenarios The approaches presented in this book can be applied to a
wide range of mobile robotics applications from automated passenger cars to planetary exploration and construction and
agricultural machines Intelligent Unmanned Ground Vehicles shows the progress that was achieved during this program
from brittle specially built robots operating under highly constrained conditions to groups of modified commercial vehicles
operating in tough environments One measure of progress is how much of this technology is being used in other applications

For example much of the work in road following architectures and obstacle detection has been the basis for the Automated Highway Systems AHS prototypes currently under development AHS will lead to commercial prototypes within a few years The cross country technology is also being used in the development of planetary rovers with a projected launch date within a few years The architectural tools built under this program have been used in numerous applications from an automated harvester to an autonomous excavator The results reported in this work provide tools for further research development leading to practical reliable and economical mobile robots

Canadian Railway and Marine World ,1929 Vehicle thermal Management Systems Conference and Exhibition (VTMS10) IMechE,2011-05-05 This book contains the papers presented at the IMechE and SAE International Vehicle Thermal Management Systems Conference VTMS10 held at the Heritage Motor Centre Gaydon Warwickshire 15 19th May 2011 VTMS10 is an international conference organised by the Automobile Division and the Combustion Engines and Fuels Group of the IMechE and SAE International The event is aimed at anyone involved with vehicle heat transfer members of the OEM tier one suppliers component and software suppliers consultants and academics interested in all areas of thermal energy management in vehicles This vibrant conference the tenth VTMS addresses the latest analytical and development tools and techniques with sessions on alternative powertrain emissions engines heat exchange manufacture heating A C comfort underhood and external internal component flows It covers the latest in research and technological advances in the field of heat transfer energy management comfort and the efficient management of all thermal systems within the vehicle Aimed at anyone working in or involved with vehicle heat transfer Covers research and technological advances in heat transfer energy management comfort and efficient management of thermal systems within the vehicle
