Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies *Curriculum*

zafer çelik,2024-04-29 In Turkish textbooks migrants are frequently portrayed as marginalized individuals who are labelled as needy guests and consumers of limited resources These textbooks fail to portray migrants as a constituent element of society neglecting to acknowledge their substantial contributions to both social and economic life Furthermore the textbooks disregard the rich tapestry of migrants lives traditions and cultures by omitting instances of successful migrant experiences This narrative promotes discontent hatred exclusion and fear towards migrants within educational institutions and society at large However defining migrants as the constituent elements of society highlighting their contributions to social and economic life and including their culture and traditions in textbooks can play a pivotal role in cultivating positive attitudes and behaviors towards immigrants A paradigm shift in depicting migrants as essential constituents of society is imperative
