Stow, 2012

*Patterns of World History* offers a distinct framework for understanding the global past through the study of origins interactions and adaptations Authors Peter von Sivers Charles A Desnoyers and George Stow each specialists in their respective fields examine the full range of human ingenuity over time and space in a comprehensive even handed and critical fashion The book helps students to see and understand patterns through ORIGINS INTERACTIONS ADAPTATIONS These key

features show the O I A framework in action Seeing Patterns a list of key questions at the beginning of each chapter focuses students on the 3 5 over arching patterns which are revisited considered and synthesized at the end of the chapter in Thinking Through Patterns Each chapter includes a Patterns Up Close case study that brings into sharp relief the O I A pattern using a specific idea or thing that has developed in human history and helped in turn develop human history like the innovation of the Chinese writing system or religious syncretism in India Each case study clearly shows how an innovation originated either in one geographical center or independently in several different centers It demonstrates how as people in the centers interacted with their neighbors the neighbors adapted to and in many cases were transformed by the idea object or event Adaptations include the entire spectrum of human responses ranging from outright rejection to creative borrowing and at times forced acceptance Concept Maps at the end of each chapter use compelling graphical representations of ideas and information to help students remember and relate the big patterns of the chapter
