**Lessons for the Social Studies Classroom** M. Lazarus, S. Cohen, K. Lambert, R. E, 2013-03-12 The idea for this book came while I was observing a student teacher and a master teacher I realized that most student teachers while in training do not have the opportunity to think creatively about their lessons I also noticed that teachers new to the field of teaching suffer the same fate they are too busy trying to survive the day and are not sure how to plan and organize their teaching Lesson plans are one of the most important tools for a teacher and more important for the novice teacher I believe that during student teaching or during their undergraduate years if students were equipped with this book their first year teaching will not look so first year Imagine an undergraduate class filled with soon to be Social Studies teachers discussing these selected lesson plans improving upon them and making them their own Most first year teachers over teach or under teach and both types still miss the marks on the standardized test These lesson plans will give the new teacher a place to begin

**Comparative Sociology of Examinations** Fumiya Onaka, 2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages

**Reading Like a Historian** Avishag Reisman, 2011 Enthusiasm about the instructional potential of primary sources dates to the late 19th century and has been echoed recently in the work of literacy experts historians and educational psychologists Yet no extended intervention study has been undertaken to test the effectiveness of primary source instruction in real history classrooms This study with 236 eleventh grade students in five San Francisco high schools represented the first large scale extended curriculum intervention in disciplinary reading in an urban district The Reading Like a Historian RLH curriculum constituted a radical departure from traditional textbook driven instruction by using a new activity structure the Document Based Lesson in which students used background knowledge and disciplinary reading strategies to interrogate and then reconcile historical accounts from multiple texts A quasi experiment control design measured the effects of a six month intervention on four dimensions 1 students historical thinking 2 their ability to transfer historical thinking strategies to

contemporary issues 3 their mastery of factual knowledge and 4 their growth in general reading comprehension MANCOVA analysis yielded significant main effects for the treatment condition on all four outcome measures Qualitative analyses of videotaped classroom lessons were conducted to determine the frequency and nature of whole class text based discussion Only nine whole class text based discussions were identified in over 100 videotaped classroom lessons despite the presence of instructional materials explicitly designed to support student discussion of debatable historical questions Analysis of teacher and student participation suggests a relationship between active teacher facilitation that reviews background knowledge and poses direct questions about texts and higher levels of student argumentation This dissertation is structured as three free standing papers each of which addresses one aspect of the larger study In the first paper I discuss the design of the quasi experimental study and report quantitative findings In the second paper I locate teacher facilitation of whole class historical discussion in the literature on classroom discourse and I propose a developmental framework for analyzing student historical argumentation in classroom discussion In the third and final paper I discuss the theoretical underpinnings of the intervention curriculum and offer two examples to illustrate the structure of the Document Based Lesson
