World History Textbook Florida:

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

Primary Sources in World History James Farr, Patrick J. Hearden, 2023-03-13 This two volume collection of primary documents covers societies that developed writing systems in different geographical regions during that last 5 000 years While comprehensive in scope this reader focuses on a central theme the unequal allocation of wealth and power both within individual societies and between different polities ranging from small city states to large territorial empires The documents reveal that people living at different times and in different places have used similar methods to achieve similar political and economic objectives By reflecting uniformities as well as diversities in ideas and actions these documents undermine assertions of Western intellectual cultural or moral superiority These readings also show that the expanding supply of goods and services resulting from technological innovations has led to increasing social economic and political racial and gender inequality Selected to give students a deeper understanding of how and why inequalities have emerged in societies around the globe each document will be introduced by a brief explanation of its historical context And each document presented in chronological order will be followed by 3 or 4 review questions giving students an opportunity to test their understanding of its main points

Resources in Education, 2001-04 *Teaching U.S. History Thematically* Rosalie Metro, 2023 Get started with an innovative approach to teaching history that develops literacy and higher order thinking skills connects the past to students lives and meets state and national

standards grades 7-12. Now in a second edition, this popular book provides an introductory unit to help teachers build a trustful classroom climate over 70 primary sources, including a dozen new ones, organized into thematic units structured around an essential question from U.S. history and a final unit focusing on periodization and chronology. As students analyze carefully excerpted documents, they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century American. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents, this teaching manual provides strategies to assess student learning, mini-lectures designed to introduce documents, activities to help students process, display, and integrate their learning, guidance to help teachers create their own units, and more.

Book Features: Addresses the politicization of history head-on with updated material that allows students entry points into the debates swirling around their education. Makes document-based teaching easy with a curated collection of primary sources: speeches by presidents and protesters, Supreme Court cases, political cartoons, excerpted into manageable chunks for students. Challenges the master narrative of U.S. history with texts from Frederick Douglass, Susan B. Anthony, Malcolm X, Cesar Chavez, Jeanne Wakatsuki Houston, and Judy Heumann. Offers printable copies of the documents included in the book, which can be downloaded at tcpress.com.

Marking the "Invisible" Andrea M. Hawkman, Sarah B. Shear, 2020-04-01. Substantial research has been put forth calling for the field of social studies education to engage in work dealing with the influence of race and racism within education and society. Branch, 2003; Chandler, 2015; Chandler-Husband, 2010; King-Ladson Billings, 2003; Ooka-Pang-Rivera-Ladson Billings, 2003; Woyshner-Bohan, 2012. In order to challenge the presence of racism within social studies research, must attend to the control that whiteness and white supremacy maintain within the field. This edited volume builds from these previous works to take on whiteness and white supremacy directly in social studies education. In *Marking the Invisible*, editors assemble original contributions from scholars working to expose whiteness and disrupt white supremacy in the field of social studies education. We argue for an articulation of whiteness within the field of social studies education in pursuit of directly challenging its influences on teaching, learning, and research. Across 27 chapters, authors call out the strategies deployed by white supremacy and acknowledge the depths by which it is used to control, manipulate, confine, and define identities, communities, citizenships, and historical narratives. This edited volume promotes the reshaping of social studies education to support the histories, experiences, and lives of Students and Teachers of Color, challenge settler colonialism, and color evasiveness, develop racial literacy, and promote justice-oriented teaching and learning. Praise for *Marking the Invisible*: As the theorization of race and racism continues to gain traction in social studies education, this volume offers a much-needed foundational grounding for the field. From the foreword to the epilogue, *Marking the Invisible* foregrounds conversations of whiteness in notions of supremacy, dominance, and rage. The chapters offer an opportunity for social studies educators to position critical theories of race, such as critical race theory.

intersectionality and settler colonialism at the forefront of critical examinations of whiteness Any social studies educator researcher concerned with the theorization or teaching of race should engage with this text in their work Christopher L Busey University of Florida *Bibliography of Research Studies in Education* ,1929 *Bulletin* ,1930 **Bulletin** United States.
