Hull,2018-12-07 Black History Month starting as Negro History Week began as an effort by Carter G Woodson 1875 1950 to recognize the valuable contributions Black African Americans have made in the United States and throughout the world African American

History which has been virtually ignored is beginning to be acknowledged in classroom books and curriculums. However, enough has not been done to fully recognize the contributions of African Americans to history. Thus, The Black History Quiz Guide was designed and created to further the goal that Carter G. Woodson was trying to accomplish: to present a fair picture of the role African Americans have played in American and World History. The black history quiz guide is divided into eight sections of black history facts. Each section begins with a black history worksheet. The worksheet is followed by fact sheets on the black history contributors who are listed on the worksheet at the end of each section. The answers to the worksheet are on the page that follows the facts. The black history quiz is designed to test your present knowledge of black history as well as enhance your knowledge of history. It is hoped that you will enjoy the quiz guide as you enrich your knowledge of the contributions that African Americans have made to history.

**Semester 1: Math and Physics**. Numbers surround us. Just try to make it through a day without using any. It's impossible: telephone numbers, calendars, volume settings, shoe sizes, speed limits, weights, street numbers, microwave timers, TV channels, and the list goes on and on. The development of these ten digits and their many uses is the fascinating story in *Exploring the World of Mathematics*.

**Physics** is a branch of science that many people consider to be too complicated to understand. John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend. Did you know that a feather and a lump of lead will fall at the same rate in a vacuum? Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances. Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space.
