Judging Jesus Wayne G. Johnson, 2016-10-12 Few persons have had greater impact on history than Jesus of Nazareth. That he existed is generally conceded. Who he was remains a major issue. Since great religions claim to possess basic and unique truths about the human venture, the Christian message about Jesus challenges other great religions. Much of world history is marked by the responses of great religions to this Christian challenge. In gospel accounts, Jesus asks of his disciples, "Who do people say that I am?" This author explores how other world religions have responded to this question over the centuries. The first chapter explains how religions function as stories by which we live. Following chapters trace answers to Jesus's question given by voices from major world religions: Christianity, Judaism, Islam, Hinduism, and Buddhism. The final chapter explores how the great religions view the ultimate fate of other believers.

The World's Religions Peter Clarke, Friedhelm Hardy, Leslie Houlden, Stewart Sutherland, 2004-01-14 Gives an account of the history, the theological basis, the practice, and the current state of the study of religion and religions throughout the world. Combines a clear and non-technical style of presentation with a structure and range of contributions which reflect the richness and complexity of religion itself, of the religions of the world, and the study of religions. Comprehensive index, bibliographies, and suggestions for further reading. Intriguing philosophical questions are raised about the nature of religion and the qualities needed for studying it. Times Higher Education Supplement. Excellent book, remarkably successful, impressive as much for the sheer scale of the undertaking as for its consistent standard of analysis. It is a fine achievement which will serve both as a very suitable textbook for students and a reliable guide to the state of scholarship in the History and Study of Religions. Heythrop Journal.

The Psychology of World Religions and Spiritualities Timothy A. Sisemore, Joshua J. Knabb, 2021-09-20 This compendium of introductory essays invites scholars and clinicians to better understand people of various faiths from around the world It is intended to correct the tendency among scientists to study religious behavior without accounting for its human dimension For example a psychologist describes a religious ceremony in a certain community as a sociological phenomenon Such a technical description is likely to strike members of that community as an attempt by science to explain away their beliefs This is counterproductive In order to work effectively and empathetically with people of faith psychologists should seek an intimate knowledge of how religion operates in the hearts and minds of living breathing human beings With this goal in mind editors Timothy Sisemore and Joshua Knabb have made one of the world's major religions the subject of a separate chapter In addition they have arranged for each chapter to be written by a psychologist who practices or is culturally connected with that religion This marks the book's unique contribution to the field it is the product of people who have lived the world's religions not merely studied them By taking such a respectful approach the book promotes an appreciation for the ways that religious belief animates inspires and instructs its adherents Moreover the indigenous point of view of these essays will help scholars identify their own biases when researching religious groups allowing them to produce more accurate and holistic analyses Psychologists understand that religion and spirituality provide meaning and purpose to billions of people around the globe But the actual experience of these beliefs eludes the grasp of the reductionistic methods of science With this resource at their side psychologists in academic and clinical settings will be equipped to understand religious experience from the bottom up and honor the beliefs and practices of the people they are trying to help

Approaching the World's Religions, Volume 1 Robert Boyd,2017-05-04 Philosophically Thinking about World Religions is different from other works in the discipline today It deviates from the typical approaches used for the study of world religions Its goal is to engage readers in thinking hard about world religions not about the data surrounding those traditions By focusing on philosophical questions each reader should be challenged to do their own investigations that may reveal the heart of these traditions Another stance that this project takes that distinguishes it from other texts in the discipline is that it advocates an inclusivist perspective regarding the world religions Pluralism which is the predominate assumption today ends either in contradiction or in the development of a metatheory that dismisses crucial distinctions between the various traditions or eliminates some ancient religions because they do not fit the metatheory By taking an open inclusivist approach all religious traditions may engage at the table of dialogue The final essay is about justice and social affairs While that discussion is couched within the context of a particular tradition each religious tradition must have the discussion But it must be more than an intrareligious dialogue it must become an interreligious dialogue
