Tales From My First 90 Years Alpha C Chiang,2021-01-28 Alpha C Chiang a renowned economist and Professor

Emeritus of Economics at the University of Connecticut is best known for his classic textbook *Fundamental Methods of Mathematical Economics*. On the academic side Alpha describes in detail his scholastic journey including why and how he created one of the most popular books on mathematical methods in economics as well as the experiences of his teaching career. On the nonacademic side he describes his ventures into his many hobbies the spices of his life including Chinese opera ballroom dancing painting and calligraphy photography piano music composition playwriting and even magic. Such tales round out the depiction of a colorful life. What's behind his unusual name Alpha? What schooling disaster tripped him at a young age? What surreal occurrence did he experience at a cliff at age 8? What major miracle changed his family? How did he become a loan shark when he was a graduate student at Columbia University? What Hollywood glamour star mysteriously materialized within inches of him when he was working on a TV show in his student days? How did he conquer a serious phobia and eventually become an acclaimed professor? What motivated his writing of his celebrated book? And what funny embarrassing and memorable events occurred in his teaching career? This book is a unique story about a unique life. **Counterpoint**

Henry Martin, 2005. *Counterpoint* is a textbook for use as a stand alone text in a course on species counterpoint or as a supplementary text for standard college level courses in music theory. It is based on Heinrich Schenker's 1868-1935 two volume study of counterpoint. It is intended to help all students of theory or composition to improve their musicianship by examining the voice leading that underlies Western tonal music. The book proceeds by developing species counterpoint in the tradition of Johann Joseph Fux and his famous *Gradus ad Parnassum* 1725 but with attention to Schenker's more in depth study. For the sake of brevity musical examples are available on the Scarecrow Press website www.scarecrowpress.com rather than within the text itself. Everyone from beginning music theory students to composers to graduate composition students will greatly benefit from the methods presented here. Rather than actually teaching a student to compose working through these exercises will improve musicianship as it applies to both composition and understanding music theory.
