Scenarios used are from real life events common to all educators Examples of forms tools adapted to the needs of educators and results are included The book is written in an easy to understand narrative style Reviewers of the original version educators who knew nothing about Lean stated they could easily understand the concepts presented and implement the model using nothing more than the book as a guide The book s presentation eliminates teacher procrastination resulting from having to figure something out and how to apply it to your work yourself when you have no extra time available for that purpose It also eliminates the need to hire a Lean consultant a plus for districts strapped for cash but desiring to implement an improvement solution *There is Another Way!* Margaret A.
