Before You Read

In this lesson, you will read about how and why we study history.

As You Read

Use a diagram to organize the lesson's main ideas and details.

GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?

of Philosophy podcast this volume presents the first full history of philosophy in the Islamic world for a broad readership It takes an approach unprecedented among introductions to this subject by providing full coverage of Jewish and Christian thinkers as well as Muslims and by taking the story of philosophy from its beginnings in the world of early Islam all the way through to the twentieth century Major figures like Avicenna Averroes and Maimonides are covered in great detail but the book also looks at less familiar thinkers including women philosophers Attention is also given to the philosophical relevance of Islamic theology kalam and mysticism the Sufi tradition within Islam and Kabbalah among Jews and to science with chapters on disciplines like optics and astronomy The book is divided into three sections with the first looking at the first

blossoming of Islamic theology and responses to the Greek philosophical tradition in the world of Arabic learning This formative period culminates with the work of Avicenna the pivotal figure to whom most later thinkers feel they must respond The second part of the book discusses philosophy in Muslim Spain Andalusia where Jewish philosophers come to the fore though this is also the setting for such thinkers as Averroes and Ibn Arabi Finally a third section looks in unusual detail at later developments touching on philosophy in the Ottoman Mughal and Safavid empires and showing how thinkers in the nineteenth to the twentieth century were still concerned to respond to the ideas that had animated philosophy in the Islamic world for centuries while also responding to political and intellectual challenges from the European colonial powers
