Unit 1 (1200-1450):

1.1: State Building in China

- China was kind of like the Texas of the ancient world: Don't mess with China.
- In 960, China was split into regional kingdoms again as the power of the Tang Dynasty was gradually waning. Zhao Kuangyin: ruler of one of those kingdoms that took it upon himself to unify most of them all again as the Song Dynasty. (960-1279)
- Song State Structure: 6 departments
 - Personnel, finance, rites, army, justice, and public works.
 - Censorate overseeing these departments. Made sure no one in these bureaucratic departments were behaving bad.
- Confucianism: chief things that helped organize the government.
 - Great continuity in Chinese culture over the years
 - According to Confucian thought, reality is fundamentally hierarchical. Everyone has their place in society, and everyone needs to behave rightly and fulfill their role for everything to go well. (People subject to rulers, etc.)
- Civil service examination:
 - Influenced by Confucian ideals. Major part of the exam was being WELL VERSED in Confucian ideals.
 - A test you had to pass in order to work in the imperial bureaucracy.

 - Increasingly commercialized Chinese society. People began to produce goods not only for local consumption, but also for distant markets. Chinese manufacturing FLOURISHED during this period.
- By the 11th century, China's iron industry was producing 32,000 suits of armor and 16 million iron arrowheads ANUALLY.
- As commerce grew, role of money also changed. As economy grew, there was not enough precious metal available for minting coins to keep up with the demand.
 - Introduction of paper money
 - Became more popular than minting coins
- Gunpowder
 - Accidental discovery by Daoist alchemists trying to discover elixir of immortality.
 - First application was fireworks and pyrotechnic displays for imperial court, not in a military context.

Wilson, 2008-10-01 This compelling book tells the history of the past two decades of efforts to reform mathematics education in California. That history is a contentious one full of such fervor and heat that participants and observers often refer to the math wars. Suzanne M. Wilson considers the many perspectives of those involved in math reform, weaving a tapestry of facts, philosophies, conversations, events, and personalities into a vivid narrative. While her focus is on California, the implications of her book extend to struggles over education policy and practice throughout the United States. Wilson's three-dimensional account of math education reform efforts reveals how the debates tend to be deeply ideological and how people come to feel misunderstood and misrepresented. She examines the myths used to explain the failure of reforms, the actual reasons for failure, and the importance of taking multiple perspectives into account when planning and implementing reform. [Index to the Periodicals](#), 1903 [The Oxford Handbook of History and Material Culture](#) Ivan Gaskell, Sarah Anne Carter, 2020-04-07 Most historians rely principally on written sources. Yet there are other traces of the past available to historians: the material things that people have chosen, made, and used. This book examines how material culture can enhance historians' understanding of the past, both worldwide and across time. The successful use of material culture in history depends on treating material things of many kinds not as illustrations but as primary evidence. Each kind of material thing and there are many requires the application of interpretive skills appropriate to it. These skills overlap with those acquired by scholars in disciplines that may abut history but are often relatively unfamiliar to historians, including anthropology, archaeology, and art history. Creative historians can adapt and apply the same skills they honed while studying more traditional text-based documents even as they borrow methods from these fields. They can think through familiar historical problems in new ways. They can also deploy material culture to discover the pasts of constituencies who have left few or no traces in written records. The authors of this volume contribute case studies arranged thematically in six sections that respectively address the relationship of history and material culture to cognition, technology, the symbolic, social distinction, and memory. They range across time and space from Paleolithic to Punk. [Index to the Periodicals of ...](#), 1895 **Handbook of Psychology, Research Methods in Psychology** Irving B. Weiner, John A.
