Alternative Capitalisms: Geographies of Emerging Regions Robert Gwynne, Denis Shaw, Thomas Klak, 2014-05-12
This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions. These are Latin America and the Caribbean, East Central Europe and the former Soviet Union, and East Asia. This book breaks new ground in three areas. First of all, it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory. Secondly, it explores the development trajectories and challenges of countries in this so-called emerging world, countries that will be crucial to the evolution of the world economy in the twenty-first century. Thirdly, it compares and contrasts the pathways of both economic and political change in the three world regions under focus. This is a unique approach in terms of books published in both geography and the social sciences. Within the context of the three world regions, the book combines historical and contemporary analysis of the evolving world system. In these regions, we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production, exchange, and regulation are evolving. The authors believe that at the present time, these processes have produced alternative capitalisms, economic and associated developments which, while assuredly capitalist, differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe.

West African Worlds Reginald Cline-Cole, Elsbeth Robson, 2016-02-17. *West African Worlds* provides a critical assessment of social, economic, and political change in Africa's most populous and arguably most externally focused region. With an emphasis on globalisation and modernisation, case studies and commentary are integrated throughout to highlight the concerns and issues of the region. Enriched by an impressive mix of West African voices, this text combines theory and application with policy and practice to address socio-economic change, the pursuit of livelihoods, and development within West Africa.

The Middle East and North Africa Alasdair Drysdale, 2024-10-15. This contemporary text, the first in over a decade on the region, presents the geography of the Middle East and North Africa defined as the Arab World: Israel, Turkey, Iran, and Afghanistan. Thematically organized, the book's eleven chapters focus on the region's physical and climatic setting, demographic characteristics, migration patterns, religious and linguistic diversity, political map, offshore claims, oil and gas resources, and subregions and states. Within this framework, Drysdale emphasizes pressing current problems, the impact of climate change in a region where some areas already suffer from extreme summer heat and aridity, the challenge of providing

additional water in a region where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map ongoing territorial and boundary disputes that often have global repercussions external dependence on the region's prolific oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues **World Regional Geography** Douglas L.

Geography 11-18: a Conceptual Approach David Lambert, John Morgan, 2010-01-16 This is a must read for all 11 18 geography educators It argues for a new geography curriculum founded on a set of major concepts that are profoundly relevant to 21st century life For years books on 11 18 geography education have focussed on classroom techniques new

pedagogic technologies and alternative modes of student assessment Not this one Teaching Geography 11 18 digs deep It asks not only what geography is for but bases its answer on a set of key concepts able to sustain an exciting and relevant curriculum It also grounds its many arguments in the latest geographical research thus re establishing the broken connection between geography teaching in schools and that in higher education Professor Noel Castree University of Manchester UK This engaging and stimulating book aims to radically re shape and sharpen debates in geography education by taking an entirely fresh approach to both the subject and its place in secondary education Key questions addressed in this book include What is the place of geography within the secondary school curriculum To what extent does school geography reflect and engage with contemporary issues and theories from the wider subject What are the issues challenges and opportunities of a concept led approach to teaching geography What are the implications of ICT media and technology for the future of geography teaching in schools Influenced by the revised national curriculum for geography which has reduced the prescribed content to be covered this book offers an objective view of the concept led approach The new focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book fills that void by examining geography s key concepts and providing teachers with a theoretically robust and practical approach to curriculum planning using a concept led approach This is essential reading for all secondary geography teachers trainee teachers and anyone involved with education and curriculum planning

Mountain Tourism and Ecological Impacts: Himalayan Region and Beyond Biswas, Soumendra Nath, Kumar, Pradip, 2024-03-27 The Himalayas with their grandeur and cultural richness magnetize global travelers searching for an escape from the ordinary However behind this allure lies an ecological responsibility and sustainability imperative Many involved with the tourism industry in mountainous regions have been confronting the stark realities of tourism s impact on these delicate ecosystems There is an urgency to address the challenges posed by climate change all while safeguarding the indigenous traditions that define the Himalayas Mountain Tourism and Ecological Impacts Himalayan Region and Beyond unravels the intricate connections between tourism development and its far reaching implications This comprehensive exploration delves deep into the heart of the Himalayan region and beyond shedding light on the diverse dimensions of mountain tourism and its profound impact on local environments communities and cultural heritage This book reveals the tapestry of tourism experiences found in the peaks and vistas of the Himalayas It delves into eco tourist s delicate dance with fragile ecosystems the coexistence of travelers and wildlife the exhilaration of adventure tourism and the spiritual pilgrimages that draw seekers from across the globe This book comprehensively explores the pivotal role of preserving local cultures and underscores this as a key element of conserving the pristine natural habitats This book is ideal for academics and researchers tourism professionals environmentalists and conservationists government and NGOs and travel enthusiasts

Rethinking Development Geographies Marcus Power, 2004-08-02 Development as a concept is notoriously imprecise

vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and the view from the South
