Michael

Hall,David Weaver,2009-01-13 A global industry and an important tool for economic development international tourism is facing an increasingly uncertain future Global environmental change including climate change increasing fuel prices and growing criticism from environmental and social interest groups are posing substantial challenges to the belief that international tourism can be sustainable at current rates and patterns of growth This book therefore aims to answer the questions of if and how tourism can be a sustainable industry The book concludes that sustainable tourism is possible but that it requires fundamental shifts in operations systems and philosophies The various contributions identify a number of means by which this can be accomplished but stress that sustainable tourism still has a long way to travel before it can reach its destination **The Routledge Handbook of Community Based Tourism Management** Sandeep Kumar

Walia,2020-12-21 This Handbook offers an up to date and comprehensive overview of core themes and concepts in community based tourism management Providing interdisciplinary insights from leading international scholars this is the first book to critically examine the current status of community based tourism Organised into five parts the Handbook provides cutting edge perspectives on issues such as Indigenous communities tourism and the environment sustainability and the impact of digital communities Part 1 introduces core concepts and methodologies and distinguishes community products from other tourism and hospitality goods Part 2 explores communities attitudes towards tourism development and their engagement with and ownership of the process It also delves into the role of community based tourism under the influence of governmental policies in the economic and social development of a region In Part 3 various management marketing and branding initiatives are identified as a means of expanding the tourism business Part 4 examines the negative impacts of mass tourism and its threats to culture tradition identity the built environment and natural heritage In the final and fifth part future challenges and opportunities for community based tourism initiatives are considered and research based sustainable solutions are proposed Overall the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities This Handbook fills a void in the current research and thus will appeal to scholars students and practitioners interested in tourism management tourism geography business studies development policy and practice regional development conservation and sustainability *Aviation and Tourism* Anne Graham,Andreas

Papatheodorou,Peter Forsyth,2016-04-08 Transport is an essential element of tourism providing the vital link between the tourist generating areas and destinations Good accessibility which is determined by the transport services provided is a fundamental condition for the development of any tourist destination Moreover the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated Aviation is an increasingly

important mode of transport for tourism markets Whilst geography has meant that in modern times air travel has always been the dominant mode for long distance travel and much international tourism moves towards deregulation and in particular the emergence of the low cost carrier sector have also increased aviation's significance for short and medium haul tourism trips Thus developments in aviation can have very major implications for many leisure and business tourism markets However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained In spite of the obvious closeness between the aviation and tourism industries there are very few specialist texts on this subject Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed whereas aviation specialist texts rarely concentrate on just leisure travel In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies Therefore it is the aim of this book to fill this important gap which exists with a comprehensive in depth study of the relationship between aviation and leisure travel The book deals exclusively with issues related to the relationship between aviation and leisure travel It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined

Tourism and Sustainability Martin Mowforth, Ian Munt, 2015-12-22 By January 2015 the world's richest 80 people had as much wealth as the poorest 50 per cent of the world's population It is a global unevenness through which the barriers to migration of Third World migrants to wealthy First World nations go ever higher while the barriers to travel in the reverse direction are all but extinct So how exactly does tourism contribute to narrowing this glaring inequality between the rich and poor Are ever expanding tourism markets a smoke free socioculturally sensitive form of human industrialisation Is alternative tourism really a credible lever for reducing global inequality and eliminating poverty Tourism and Sustainability critically explores the most significant universal geopolitical norms of the last half century development globalisation and sustainability and through the lens of new forms of tourism demonstrates how we can better get to grips with the rapidly changing new global order The fourth edition has been extensively revised and updated and benefits from the addition of new material on climate change and tourism Drawing on a range of examples from across the Third World Mowforth and Munt expertly illustrate the social economic and environmental conditions that continue to affect the tourism industry With the first edition hailed by Geoffrey Wall as one of the most significant books produced on tourism since the turn of the millennium Tourism and Sustainability remains the essential resource for students of human geography environmental sciences and studies politics development studies anthropology and business studies as well as tourism itself
