The different types of pots you can use to plant vegetables and how to choose the best planter for your plants. The conditions required for your plants to grow healthy and big, and what your potting mix should comprise of. The difference between planting from seedlings and planting seeds, and the benefits of both, including which plants are best suited for either. The essential gardening tools you will need and how to maintain the tools. The common plant diseases for plants in containers and how to deal with them.
