Plants People And The Planet:

People & the Planet ,1992 Plants, People, and the Planet: An Introduction to Horticulture (First Edition) Nathaniel Mitkowski, Bridget Ruemmele, 2013-12-31 The Third Report on The State of the World's Plant Genetic Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2025-03-24 Plant genetic resources for food and agriculture PGRFA are the essence of sustainable agrifood systems They encompass the genetic diversity in both improved and farmers varieties as well as in crop wild relatives wild food plants and breeding materials. The third report on the State of the World's Plant Genetic Resources for Food and Agriculture presents a comprehensive assessment of the conservation and sustainable use of PGRFA as well as the human and institutional capacities to support these efforts Based on information from 128 countries and four regional and 13 international research centres and the contribution from over 1 600 experts it presents an overview of progress since 2012 as well as current needs and challenges in the future management of PGRFA The report provides a sound basis for recalibrating relevant polices and strategies including the rolling Global Plan of Action for Plant Genetic Resources for Food and Agriculture The plants that feed the world Food and Agriculture Organization of the United Nations, 2023-08-29 The availability of comprehensive and reliable information is crucial for developing evidence based policies and strategies for the conservation and use of plant genetic resources for food and agriculture Information on food and agricultural crops on their use interdependence demand supply and security is increasingly available but scattered through a number of information systems databases and scientific literature This study was undertaken by a team of international experts to pool together information from a wide range of sources in a user friendly manner and to develop a reproducible set of metrics and indicators complementing existing indicators. The main global database sources consulted include FAOSTAT the Data Store of the International Treaty FAO WIEWS Genesys PGR GBIF PlantSearch the Svalbard Global Seed Vault's SeedPortal UPOV's PLUTO database and NCBI's Entrez database The resulting metrics were organized into five domains crop use interdependence demand supply and security The study includes findings about the importance of the Multilateral System of Access and Benefit sharing of the International Treaty the primary global operational mechanism to exchange plant germplasm needed for research and breeding around the world while pointing at gaps and possibilities to enable its growth A number of vignettes complete the study with information on contemporary issues on crop conservation and use to further showcase how the management of plant genetic diversity is evolving at present It is hoped that this publication will support countries researchers breeders and other stakeholders in prioritizing activities implementing multilateral frameworks and leading policy discussions related to plant genetic resources for food and agriculture The Living Planet Norman Maclean, 2023-04-20 This comprehensive volume describes the present state of wildlife on a global scale using a taxonomic approach Biochar in Mitigating Abiotic Stress in Plants Arafat Abdel Hamed Abdel Latef, 2024-10-31 Biochar for Mitigating Abiotic Stress in Plants provides a unique and leading resource for

utilizing biochar to address specific plant health challenges including osmotic ionic and oxidative stress With a focus on crop yielding plants the book provides targeted application insights to improve plant health and resulting crop production Readers will find important tools toward the identification treatment and management of a variety of abiotic stressors through the effective and appropriate application of biochar This is an important reference for those seeking to apply current knowledge and an inspiration for further research in the area Biochar is a carbon rich organic substance produced by the pyrolysis of organic materials in the absence or presence of oxygen It is an organic matter conditioner that can boost carbon sequestration and organic and inorganic pollutant immobilization It is a crucial method for soil regeneration Additionally biochar facilitates increasing mineral supply and soil organic matter resulting in soils with increased nutritional content Covers the latest evidence based approach in the diagnosis and management of plants under abiotic stress Includes easy to follow algorithms and key points Proposes options for sustaining crop production under the effects of climate change

Medicinal Plant Responses to Stressful Conditions Arafat Abdel Hamed Abdel Latef, 2023-05-11 Medicinal Plant Responses to Stressful Conditions discusses the effects of multiple biotic and abiotic stressors on medicinal plants It features information on biochemical molecular and physiological strategies used to mitigate or alleviate detrimental effects of biotic and abiotic stressors The book contains chapters featuring medicinal plants of importance covering subjects including genomics functional genomics metabolomics phenomics proteomics and transcriptomics under biotic and abiotic stress of medicinal plants and their molecular responses It suggests exogenous application of different types of stimulants to enhance medicinal plant production in such conditions Features Details all aspects of biotic and abiotic stressors in various important medicinal plant species Chapters cover evidence based approaches in the diagnosis and management of medicinal plants under stressful conditions Includes information on ways to mitigate effects from biotic stress diseases and pests or abiotic stress high salinity drought temperature extremes waterlogging wind high light intensity UV radiation heavy metals and mineral deficiencies A volume in the Exploring Medicinal Plants series this book is an essential resource for plant scientists botanists environmental scientists and anyone with an interest in herbal medicine **Arrivals and Departures** Otto Latva, Heta Lähdesmäki, Kirsi Sonck-Rautio, Harri Uusitalo, 2024-09-23 This book explores the human relationship to changing biodiversity by bringing together multidisciplinary insights into human nature relations from the humanities New animal and plant species arrive and previously existing ones may disappear However the historical and social perspectives of the changes have been understudied so far This book approaches the human relationship with changing biodiversity from three different angles belonging and non belonging emotions and environmental policy The question of belonging and non belonging is crucial when it comes to changing biodiversity The authors ask who decides where species can move and live and when invasive becomes native Similarly emotions have a big role in human nature relations The book shows why we grieve the loss of some species and hate some other species and how our emotions change over time. The writers also aim to

show how environmental policies or the practice of governing species are affected by societal discussion emotions scientific research and topical concepts as well as how these policies shape biodiversity and our perceptions of different species The authors provide fresh insights into human nature relations and explain why we need multidisciplinary approaches in order to Animals, Plants and Afterimages Valérie Bienvenue, Nicholas Chare, 2022-03-11 The fully understand their complexity sixth mass extinction or Anthropocene extinction is one of the most pervasive issues of our time Animals Plants and Afterimages brings together leading scholars in the humanities and life sciences to explore how extinct species are represented in art and visual culture with a special emphasis on museums Engaging with celebrated cases of vanished species such as the quagga and the thylacine as well as less well known examples of animals and plants these essays explore how representations of recent and ancient extinctions help advance scientific understanding and speak to contemporary ecological and environmental concerns Medicinal Plants Sanjeet Kumar, 2022-11-02 This book Medicinal Plants provides a comprehensive overview of plant species helpful for treating and preventing human diseases and disorders It also discusses how to obtain sustainable healthcare systems from nature and make harmony with currently available medicinal wealth ecology and the community The People's Illustrated Dictionary of the English Language Noah Webster, 1874

Medicinal and Aromatic Plants of Turkey Ákos Máthé, Kenan Turgut, 2023-11-01 This is meant to be the 10th volume of the series Medicinal and Aromatic Plants of the World Similarly to the previous volumes the work will deal in a monographic form with MAPs characteristic famous or simply known of Turkey a large country that is connecting Europe with Asia Turkey has extremely rich and varied topographic ecologic conditions As a result the flora of Turkey abounds in an astonishingly great number of endemic MAP species Traditional present and possible prospective uses will be discussed Scientific and technological achievements will be equally presented Briefly the volume is aimed to look carefully at our present knowledge of this vast interdisciplinary domain of medicinal and aromatic plants with a focus on Turkey In the era of global climate change and Covid pandemics building on the huge Turkish traditions the proposed volume of the series is expected to make an important contribution to the better knowledge and understanding of the MAP wealth of the World

Conservation Genetics in the Neotropics Pedro M. Galetti Jr.,2023-08-29 This book explores how genetics and the new technologies in genomics have been used for conservation of plants and animals in the Neotropics It shows the new perspective for conservation genetics beyond the use of theoretical and methods in genetics at species level and presents how genetics and genomics can be used for assessing communities Conservation genetics and genomics are presented as a helpful field of study for resolving taxonomic uncertainties and hidden biodiversity understanding populations and extinction risk genetic management wildlife forensic genetics assessing biology and molecular ecology assessing communities conservation genomics and the use of conservation biology and genetics in science learning highlighting case studies in the Neotropics Applications of conservation genetics for management or policy decision making planning and implementation of

conservation practice in the Neotropics are addressed across chapters This book will interest to researchers and students in conservation genetics and biology conservation interested in the Neotropics Stakeholders and decision makers in conservation biology may also find this book useful *Exploring Traditional Wild Edible Plants* Vibhor Agarwal, Sachidanand Singh, Rahul Datta, 2025-02-11 Wild edible plants are native species that grow and reproduce naturally in their natural habitats without domestication These plants can serve as a healthier alternative to farmed crops that may be heavily laden with pesticides and other poisonous substances This book focuses on assessment of the nutritional value potential health benefits and mechanisms of action of various wild edible plants It presents information on nutrients and bioactive ingredients that can have health advantages including antioxidant properties antimicrobial anti inflammatory and antidiabetic effects Features Comprehensive exploration of potential benefits as well as side effects of wild edible plants Special emphasis is placed on diversity category and pharmacological values of wild edible plants Discusses challenges regarding the usage of wild edible plants such as overharvesting and habitat destruction safety and toxicity A volume in the Exploring Medicinal Plants series this book highlights bioactive compounds and therapeutic efficacies of various wild edible plant species It is useful reading for scientists researchers academia and plant scientists interested in the health benefits of wild edible plants

Ethnopharmacology and OMICS Advances in Medicinal Plants Volume 2 Mukesh Nandave, Rohit Joshi, Jyoti Upadhyay, 2024-10-16 This book delves into diverse facets and applications of medicinal plants It discusses the metabolic transcriptomic and genomic intricacies of medicinal plants shedding light on their chemical compositions genetic makeup and regulatory mechanisms It includes a chapter on nanotechnology investigating the influence of nanoparticles on medicinal plants Subsequent chapters explore functional genomics and genome editing showcasing innovative approaches to modifying plant genetics It also discusses plant associated microorganisms in the microbiome and endophytic fungi Furthermore the book addresses the critical issues of genetic diversity agrotechnology for sustainable production intellectual property rights and the impact of various stresses on medicinal plants This book serves as a valuable resource for researchers educators and students of pharmacology offering a comprehensive understanding of medicinal plants and their evolving role in science and medicine The Ecological and Societal Consequences of Biodiversity Loss Michel Loreau, Andy Hector, Forest Isbell, 2022-02-11 The idea that changes in biodiversity can impact how ecosystems function has over the last quarter century gone from being a controversial notion to an accepted part of science and policy As the field matures it is high time to review progress explore the links between this new research area and fundamental ecological concepts and look ahead to the implementation of this knowledge This book is designed to both provide an up to date overview of research in the area and to serve as a useful textbook for those studying the relationship between biodiversity and the functioning stability and services of ecosystems The Ecological and Societal Consequences of Biodiversity Loss is aimed at a wide audience of upper undergraduate students postgraduate students and academic and research staff **Evolution and Speciation in Plants**

T.J. Pandian, 2022-08-01 Plants are autotrophs and sessile while animals are heterotrophs and motile Sessility has imposed on plants 94% hermaphroditism 23% selfing 3% polyploidization and 39% clonality in comparison to 19 and Sustainable Utilization and Conservation of Plant Genetic Diversity Jameel M Al-Khayri, Shri Mohan Jain, Suprasanna Penna, 2024-03-28 This book collates a wide spectrum of topics relevant to contemporary research achievement in sustainable utilization of plant genetic resources and conservation of plant genetic diversity within the framework of different crop systems It introduces the status of crop genetic diversity and provides prospects for conservation of crop genetic diversity for sustainable agriculture Plant genetic diversity is crucial for food security and agro ecosystem maintenance paving ways to achieve sustainable agriculture development This necessitates consciously and judiciously the conservation of all existing plant genetic resources for sustainable use in a variety of applications for human welfare The wild and traditional landraces have generated an increased interest as a repertoire of valuable traits for breeding and improvement of cultivated germplasm Internationally concerted actions and policies toward for the conservation and management of plant genetic diversity are mounting from the organization levels to national policies as deemed appropriate for the sustainable development goals This needs an understanding of genetic diversity of different crops ecological drivers and the structural changes within genetic diversity due to climate change It is also equally important to evolve knowledge on what how and where to conserve the existing plant genetic resources for present and future use Assessment of the genetic diversity presents in a wild and traditional agro ecosystem is another step towards effective utilization In the past few years advanced breeding tools have been developed which have offered great promise for efficient modification of targeted traits This book consolidates current knowledge in the above core areas of plant genetic diversity and conservation It is an essential reference for professionals researchers policy makers and commercial entrepreneurs concerned with plant genetic diversity and breeding to achieve enhanced agricultural productivity and sustainability of food resources to ensure food security The book is also invaluable for graduate students involved in agriculture research **Human-Plant Entanglement: Thinking** with Plants in the Anthropocene, 2025-06-12 Human Plant Entanglement Thinking with Plants in the Anthropocene is an edited collection that redefines the boundaries of phytocentric scholarship By foregrounding the question of the Anthropocene at the centre of plant studies this book illustrates how attentiveness to plant life can allow our habitual anthropocentric instrumental assumptions to be invaded by a unique phytocentric impression that presents a new ethical imaginary for a human plant relationship With twelve carefully argued essays this book sets a new benchmark in the field of Critical Plant Studies Engineering Plant-Based Food Systems Sangeeta Prakash, Bhesh Bhandari, Claire Gaiani, 2022-11-16 Engineering Plant Based Food Systems provides a comprehensive in depth understanding on the technologies used to create quality plant based foods This title helps researchers and food processors gain an understanding of the diverse aspects of plant based foods with a focus to meet the current consumers demand of alternatives to animal

products This is a one stop source that provides maximum information related to plant based foods to food science researchers food engineers and food processing manufacturers. This book will enhance their understanding of plant based protein sources their application product manufacturing and bioavailability. In recent years the emphasis on minimizing environmental footprints climate change greenhouse gas emissions deforestation and loss of biodiversity and human health issues related to animal source food intakes has shifted the attention of researchers dietitians and health professionals from animal based diets to diets rich in plant based foods legumes nuts seeds Explores the plant sources available for extraction of proteins the various extraction methods and the quality and functionality of the extracted proteins Describes existing plant based foods such as beverages yogurts spreads fermented foods and meats Provides information related to various plant based functional components such as polyphenols phytosterols aromatics and essential oils etc
