Scientific and Technical Aerospace Reports ,1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Observation Skills for Effective Teaching* Gary D. Borich,2016-01-08 Thoroughly updated for the new era of Common Core Standards this seventh edition of *Observational Skills for Effective Teaching* is vital in this time of educational change It offers a detailed yet easily accessible handbook for teachers to prepare for and design their first classroom experiences Updated with the newest research on effective teaching and learning the book cogently introduces such topics as learning climate classroom management and lesson clarity with the newest findings that lead to desirable cognitive social and emotional outcomes in learners *The Geology of Stratigraphic Sequences* Andrew D. Miall,2010-06-09 It has been more than a decade since the appearance of the First Edition of this book Much progress has been made but some controversies remain The original ideas of Sloss and of Vail building on the early work of Blackwelder Grabau Ulrich Levorsen and others that the stratigraphic record could be subdivided into sequences and that these sequences store essential information about basin forming and subsidence processes remains as powerful an idea as when it was first formulated The definition and mapping of sequences has become a standard part of the basin analysis process The main purpose of this book remains the same as it was for the first edition that is to situate sequences within the broader context of geological processes and to answer the question why do sequences form Geoscientists might thereby be better equipped to extract the maximum information from the record of sequences in a given basin or region Tectonic climatic and other mechanisms are the generating mechanisms for sequences ranging over a wide range of times scales from hundreds of millions of years to the high frequency sequences formed by cyclic processes lasting a few tens of thousands of years
