This book was written to help people understand that economics is a behavioral science and there are reasons for some economic policy working and other failing The book is not meant to be a text book but only give the reader what they need to ask the questions they need to find the answers they need to be a more informed voter These questions are how will people acting in their own best interest respond and how is force being used We often try to make thing more complicated then they need to be With any behavioral science it is simply people acting in their own best interest or the rational man concept that we need to focus on Many things may sound good but will they work
