6th International Conference on the Development of Biomedical Engineering in Vietnam (BME6) Toi Vo Van, Thanh An Nguyen Le, Thang Nguyen Duc, 2017-09-21 Under the motto Healthcare Technology for Developing Countries this book publishes many topics which are crucial for the health care systems in upcoming countries The topics include Cyber Medical Systems Medical Instrumentation Nanomedicine and Drug Delivery Systems Public Health Entrepreneurship This proceedings volume offers the scientific results of the 6th International Conference on the Development of Biomedical Engineering in Vietnam held in June 2016 at Ho Chi Minh City 5th International Conference on Biomedical Engineering in Vietnam Vo Van Toi, Tran Ha Lien Phuong, 2014-11-18 This volume presents the proceedings of the Fifth International Conference on the Development of Biomedical Engineering in Vietnam which was held from June 16 18 2014 in Ho Chi Minh City The volume reflects the progress of Biomedical Engineering and discusses problems and solutions I aims identifying new challenges and shaping future directions for research in biomedical engineering fields including medical instrumentation bioinformatics biomechanics medical imaging drug delivery therapy regenerative medicine and entrepreneurship in medical devices Sleep Disorders and Airway Diseases Sy Duong-Quy, Naricha Chirakalwasan, Timothy C Raig, Vinh Nhu Nguyen, 2023-09-15 **Smart Sensors for Healthcare and Medical Applications** Domenico Formica, Emiliano Schena, 2021-09-01 This book focuses on new sensing technologies measurement techniques and their applications in medicine and healthcare Specifically the book briefly describes the potential of smart sensors in the aforementioned applications collecting 24 articles selected and published in the Special Issue Smart Sensors for Healthcare and Medical Applications We proposed this topic being aware of the pivotal role that smart sensors can play in the improvement of healthcare services in both acute and chronic conditions as well as in prevention for a healthy life and active aging The articles selected in this book cover a variety of topics related to the design validation and application of smart sensors to healthcare *Soft Computing Applications* Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-02 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications or SOFA 2014 held on 24 26 July 2014 in Timisoara Romania This edition was organized by the University of Belgrade Serbia in conjunction with Romanian Society of Control Engineering and Technical Informatics SRAIT Arad Section The General Association of Engineers in Romania Arad Section Institute of Computer Science Iasi Branch of the Romanian Academy and IEEE Romanian Section The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability robustness and low solution cost Soft computing facilitates the use of fuzzy logic neurocomputing evolutionary computing and probabilistic computing in combination leading to the concept of hybrid intelligent systems The combination of such intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and

technological disciplines in order to show the great potential of Soft Computing in all domains The conference papers included in these proceedings published post conference were grouped into the following area of research Image Text and Signal Processing li Intelligent Transportation Modeling and Applications Biomedical Applications Neural Network and Applications Knowledge Based Technologies for Web Applications Cloud Computing Security Algorithms and Computer Networks Knowledge Based Technologies Soft Computing Techniques for Time Series Analysis Soft Computing and Fuzzy Logic in Biometrics Fuzzy Applications Theory and Fuzzy Control Bussiness Process Management Methods and Applications in Electrical Engineering The volumes provide useful information to professors researchers and graduated students in area of soft computing techniques and applications as they report new research work on challenging issues Mobile Health Sasan Adibi,2015-02-18 This book offers a comprehensive report on the technological aspects of Mobile Health mHealth and discusses the main challenges and future directions in the field It is divided into eight parts 1 preventive and curative medicine 2 remote health monitoring 3 interoperability 4 framework architecture and software hardware systems 5 cloud applications 6 radio technologies and applications 7 communication networks and systems and 8 security and privacy mechanisms The first two parts cover sensor based and bedside systems for remotely monitoring patients health condition which aim at preventing the development of health problems and managing the prognosis of acute and chronic diseases The related chapters discuss how new sensing and wireless technologies can offer accurate and cost effective means for monitoring and evaluating behavior of individuals with dementia and psychiatric disorders such as wandering behavior and sleep impairments The following two parts focus on architectures and higher level systems and on the challenges associated with their interoperability and scalability two important aspects that stand in the way of the widespread deployment of mHealth systems The remaining parts focus on telecommunication support systems for mHealth including radio technologies communication and cloud networks and secure health related applications and systems All in all the book offers a snapshot of the state of art in mHealth systems and addresses the needs of a multidisciplinary audience including engineers computer scientists healthcare providers and medical professionals working in both academia and the industry as well as stakeholders at government agencies and non profit organizations **Awakening and Sleep□Wake Cycle Across Development** Piero Salzarulo,Gianluca Ficca,2002-05-29 Sleep and wakefulness undergo important changes with age Awakening a crucial event in the sleep wake rhythm is a transition implying complex physiological mechanisms Its involvement in sleep disturbances is also well known This collective volume is the first attempt to systematically approach awakening across development A methodological section considers criteria to define awakening in a developmental perspective Theoretical considerations on development of wakefulness and on its relation to consciousness are included and provide a vigorous impulse to go beyond present criteria and classifications Age changes are the core of studies on development a section of the book examines old and new data from preterm to infants up to children underscoring the main turning points along this developmental path As

for other aspects of development awakening and the sleep wake cycle are also influenced by external factors both physical and human Several contributions deal with this topic in particular focusing on the parent infant interaction and the influences of culture Clinical contexts offer an opportunity to show both quantitative and qualitative changes of awakening and arousals in different pathological conditions Either partial changes of one physiological variable or global and massive changes can be observed Series B

Pediatric Respiratory Critical Illness: Etiology, Diagnosis, and Treatment

Rujipat Samransamruajkit ,Hongxing Dang,Karen Ka Yan Leung,2025-09-25 Severe respiratory diseases in children such as severe pneumonia acute respiratory distress syndrome and severe bronchopulmonary dysplasia pose a significant threat to pediatric health Despite the advancements made by the medical community in these domains over the past few decades numerous unknown factors and challenges persist In order to identify improved etiological insights diagnostic techniques and therapeutic strategies we call upon the global medical community to strengthen collaborative efforts collectively propelling the further exploration of this field Our aim is to conduct in depth research on severe respiratory diseases in children investigating their etiology enhancing diagnostic methodologies and refining treatment approaches with the goal of elevating the standard of pediatric health and alleviating the burden on both families and society
