Rethinking The Bse Crisis:

Rethinking the BSE Crisis Louise Cummings, 2010-08-09 In 1986 the emergence of a novel brain disease in British cattle presented a unique challenge to scientists How that challenge was addressed has been the subject of a public inquiry and numerous academic studies conducted to date However none of these investigations has sought to examine the reasoning of scientists during this critical period in the public health of the UK Using concepts and techniques in informal logic argumentation and fallacy theory this study reconstructs and evaluates the reasoning of scientists in the ten year period between 1986 and 1996 Specifically a form of presumptive reasoning is described in which extensive use is made of arguments traditionally identified as informal fallacies In the context of the adverse epistemic conditions that confronted scientists during the BSE epidemic these arguments were anything but fallacious serving instead to confer a number of epistemic gains upon scientific inquiry This book argues for a closer integration of philosophy with public health science an integration that is exemplified by the case of scientific reasoning during the BSE affair It will therefore be of interest to advanced students academics researchers and professionals in the areas of public health science and epidemiology as well as philosophical disciplines such as informal logic argumentation and fallacy theory and epistemology **Rethinking the Bse**

The Interfaces Kerstin Schwabe, Susanne Winkler, 2003-03-20 The Interfaces Deriving and Interpreting Omitted Structures is a collection of never before published papers that explore the nature of the interfaces of syntax with semantics phonology and discourse The papers investigate the various ways in which elliptical structures are related to these interfaces As such they not only make a valuable contribution to generative linguistic research but more generally help to deepen our understanding of the relation between form and meaning in natural language In the book s introductory chapter the editors address general issues related to current work on ellipsis and the syntax semantics syntax phonology and syntax discourse interfaces The rest of the book is organized into three parts The first examines PF deletion accounts of elliptical structures the second investigates these structures from the perspective of the syntax semantic interface and the third explores these from a perspective that concentrates on the relation between semantics and focus and discourse structure Together the papers collected in this volume offer a convincing demonstration of the value of collaborative research on the interfaces

17N's Philosophy of Terror Ioanne K. Lekea, 2014-02-10 This book uses a cross disciplinary approach to examine the creation development ideology and practice of the Marxist terrorist group 17N Were the members of 17N individuals with high moral principles as they claimed who did their best to protect the civilians who happened to be within their field of operations Or were they simply violent guerillas who prioritized successful assassinations of their targets at any cost The textual analysis of this book addresses these

questions and studies 17N from inception to the time when its members were arrested providing a uniquely thorough examination of the organization manifestos and its correlation to the group's ideology and actual practices 17N's Philosophy of Terror An Analysis of the 17 November Revolutionary Organization first outlines the political and ideological framework of 17 and then describes their terrorist strategy and tactics The authors consider these operations in the context of the manifestos that followed the terrorist acts and conclude the work by addressing the events following the apprehension of 17N members the trial the verdicts the appeal trial and the conclusion of appeal trial

Reasoning and Public Health: New Ways of Coping with Uncertainty Louise Cummings, 2015-03-27 This book argues that in order to be truly effective public health must embrace a group of reasoning strategies that have traditionally been characterized as informal fallacies It will be demonstrated that these strategies can facilitate judgements about complex public health issues in contexts of uncertainty The book explains how scientists and lay people routinely resort to the use of these strategies during consideration of public health problems Although these strategies are not deductively valid they are nevertheless rationally warranted procedures Public health professionals must have a sound understanding of these cognitive strategies in order to engage the public and achieve their public health goals The book draws upon public health issues as wide ranging as infectious diseases food safety and the potential impact on human health of new technologies It examines reasoning in the context of these issues within a large scale questionnaire based survey of nearly 900 members of the public in the UK In addition several philosophical themes run throughout the book including the nature of uncertainty scientific knowledge and inquiry The complexity of many public health problems demands an approach to reasoning that cannot be accommodated satisfactorily within a general thinking skills framework This book shows that by developing an awareness of these reasoning strategies scientists and members of the public can have a more productive engagement with public health problems

Reconsidering Science Learning Eileen Scanlon, 2004 This informative book looks at science learning in a wide range of contexts It is divided into three parts Part one deals with the arguments put forward for studying science and includes a discussion on what science learners need to know about the nature of science and how decisions about what forms science curricula are made Part two includes articles on the processes

by which science is learned and part three deals with inclusivity and diversity in science learning and what widening participation means for science education This is a companion book to *Mediating Science Learning through ICT* also published by RoutledgeFalmer *Reconsidering Science Learning* will be of particular interest to teachers on masters courses in science education and academics with an interest in science education *Cognitive Pragmatics* Hans-Jörg

Schmid,2012-08-31 Speakers tend to compose their utterances in such a way that the message they want to get across is hardly ever fully encoded by the meanings of the words and the grammar they use Instead speakers rely on hearers adding conceptual and emotive content while interpreting the contextually appropriate meanings and intentions behind utterances This insight which is of course particularly relevant in all kinds of indirect figurative or humorous talk lies at the heart of the linguistic discipline of pragmatics If pragmatics is the study of meaning in context then cognitive pragmatics can be broadly defined as encompassing the study of the cognitive principles and processes involved in the construal of meaning in context While it would seem only natural that pragmatics as such should have addressed such cognitive issues anyway it has mainly been due to the historical rooting of this discipline in the philosophy of language that psychological aspects have not been in the pragmatic limelight to date Being part of the 9 volume series *Handbooks of Pragmatics* this volume is the first to systematically survey this terrain from a wide range of perspectives It collects state of the art contributions by leading experts from the fields of pragmatics psycholinguistics cognitive linguistics clinical linguistics and historical linguistics The volume is divided into four parts which tackle the following questions Part I The cognitive principles of pragmatic competence What are the general cognitive principles underlying pragmatic competence i e the skill to arrive at context dependent meanings of utterances What are the cognitive underpinnings of language users ability to compute or infer intended meanings in the role of hearers and to give hints as to how to decode intended meanings in the role of speakers Part II The psychology of pragmatics What are the actual cognitive processes taking place during online construal of meaning in context on the basis of encoded messages How is pragmatic competence acquired in childhood What are the types sources and effects of pragmatic disorders i e impairments of pragmatic competence Part III The construal of non explicit and non literal meaning in context What are the cognitive principles and processes involved in the construal of meanings of non explicit and indirect utterances How do we process figurative meanings humour and gestures Part IV The emergence of linguistic structures from meaning in context What are the repercussions of the repeated construal of context dependent meanings on linguistic structures and the linguistic system How does the system change under the influence of the construal of meanings in social situations Reduced series price print available degruyter de rhenus com **Fallacies in Medicine and Health** Louise Cummings,2020-02-29 This textbook examines the ways in which arguments may be used and abused in medicine and health The central claim is that a group of arguments known as the informal fallacies including slippery slope arguments fear appeal and the argument from ignorance undertake considerable work in medical and health contexts and

that they can in fact be rationally warranted ways of understanding complex topics contrary to the views of many earlier philosophers and logicians Modern medicine and healthcare require lay people to engage with increasingly complex decisions in areas such as immunization lifestyle and dietary choices and health screening Many of the so called fallacies of reasoning can also be viewed as cognitive heuristics or short cuts which help individuals make decisions in these contexts Using features such as learning objectives case studies and end of unit questions this textbook examines topical issues and debates in all areas of medicine and health including antibiotic use and resistance genetic engineering euthanasia addiction to prescription opioids and the legalization of cannabis It will be useful to students of critical thinking reasoning logic argumentation rhetoric communication health humanities philosophy and linguistics **Rethinking Development**

Strategies After the Financial Crisis Alfredo Fernando Calcagno, Sebastian Dullien, Alejandro Márquez-Velázquez, Nicolas Maystre, Jan Priewe, 2015 **The Right to Vegetarianism** Carlo Prisco, 2016-12-07 This book argues that vegetarian and

vegan people should be guaranteed the right to eat according to their beliefs The author claims that the right to vegetarianism is backed by the human and civil rights recognized in the constitutions of several nations The first half of the book is based on the history of the main philosophical issues involved in eating plant food from Pythagoras to Francione while the second part is intended to compare different western legal systems and their report with human and animal rights The Right to Vegetarianism represents a cross between animal and human rights and also serves as a proposal to support veganism from a different approach not just as an animal right not yet recognized by the law but also as a human right already enforced by the law **The Pandemic of Argumentation** Steve Oswald, Marcin Lewiński, Sara Greco, Serena

Villata, 2022-02-25 This open access book addresses communicative aspects of the current COVID 19 pandemic as well as the epidemic of misinformation from the perspective of argumentation theory Argumentation theory is uniquely placed to understand and account for the challenges of public reason as expressed through argumentative discourse The book thus focuses on the extent to which the forms norms and functions of public argumentation have changed in the face of the COVID 19 pandemic This question is investigated along the three main research lines of the COST Action project CA 17132

European network for Argumentation and Public PoLicY analysis APPLY descriptive normative and prescriptive The volume offers a broad range of contributions which treat argumentative phenomena that are directly related to the changes in public discourse in the wake of the outburst of COVID 19 The volume additionally places particular emphasis on expert argumentation given i the importance expert discourse has had over the last two years and ii the challenges that expert argumentation has faced in the public sphere as a result of scientific uncertainty and widespread misinformation

Contributions are divided into three groups which i examine various features and aspects of public and institutional discourse about the COVID 19 pandemic ii scrutinize the way health policies have been discussed debated attacked and defended in the public sphere and iii consider a range of proposals meant to improve the quality of public discourse and public deliberation in

particular in such a way that concrete proposals for argumentative literacy will be brought to light Overall this volume constitutes a timely inquiry into all things argumentative in pandemic discourse This volume is of interest to a broad readership including philosophers linguists communication and legal scholars and members of the wider public who seek to better understand the discourse surrounding communicative phenomena in times of crisis COST European Cooperation in Science and Technology is a funding organisation for research and innovation networks For more information www.cost.eu

Food Safety, Risk Intelligence and Benchmarking Sylvain Charlebois, 2017-01-30 This book comprehensively argues for more future benchmarking between nations Since the initial food safety benchmarking report was published in 2008 the sharing of data and protocols among nations has dramatically increased It was intended to identify and evaluate common elements among global food safety systems More specifically benchmarking identifies those countries that employ comparatively best practices to assess manage and communicate the risks related to the safety of food and their respective food systems The overarching intent of this benchmarking assessment however is to stimulate exchange and discussion on food safety performance among nations
