

Gas Behavior in the Real World

Name _____

Skill Review Skill – Student will accurately describe the relationship between P, V, T and n of gases.)

In your everyday life, you often experience the different gas laws discussed in class, in action. In the table below are some situations that may be familiar to you. Think about each situation and in column 2, describe in your own words what is happening on the microscopic (molecular) level. In column 3, write the name of the simple law (Avogadro's, Boyle's, Charles' or Dalton's) that best describes the situation. In the two extra rows at the bottom, add some additional situations, not already discussed, that you have experienced.

Everyday Situation	Microscopic Description	Law
1. The pressure shown on a tire gauge doubles as the mass of air is doubled (at a constant temperature).		Avogadro's
2. A balloon over the mouth of a bottle containing air begins to expand when it is moved in to sunlight.		Charles'
3. An car piston compresses gases while the engine is working.		Boyle's
4. An inflated rubber raft gets softer when some of the gas is allowed to escape.		Avogadro's
5. A balloon placed in a sauna increases in size.		Charles'
6. A hot air balloon lands when burners under the balloon's open end turn off.		Charles'
7. When you squeeze an inflated balloon, it seems to push back harder in to your hand.		Boyle's
8. A highly pressurized tank of helium gas will fill hundreds of balloons.		Boyle's
9. Red, yellow and blue bingo balls are flying around inside a bingo caller's dispenser. The effect on the sides of the container is the same as if an equal number of all red bingo balls are in the container.		Dalton's
10. When the number of bingo balls is doubled, the effect on the sides of the container is doubled.		Avogadro's
11.

ICCS20 - 20th International Conference on Composite Structures Nicholas Fantuzzi, 2017-07-24

Composite materials have aroused a great interest over the last few decades as proven by the huge number of scientific papers and industrial progress The increase in the use of composite structures in different engineering practices justify the

present international meeting where researches from every part of the globe can share and discuss the recent advancements regarding the use of structural components within advanced applications such as buckling vibrations repair reinforcements concrete composite laminated materials and more recent metamaterials Studies about composite structures are truly multidisciplinary and the given contributions can help other researches and professional engineers in their own field This Conference is suitable as a reference for engineers and scientists working in the professional field in the industry and the academia and it gives the possibility to share recent advancements in different engineering practices to the outside world This book aims to collect selected plenary and key note lectures of this International Conference For this reason the establishment of this 20th edition of International Conference on Composite Structures has appeared appropriate to continue what has been begun during the previous editions ICCS wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures sandwich panels nanotechnology bio composites delamination and fracture experimental methods manufacturing and other countless topics that have filled many sessions during this conference As a proof of this event which has taken place in Paris France selected plenary and key note lectures have been collected in the present book *Delaware Composites Design Encyc* University of Delawa,1990-03-28 Introduction to Anisotropic Elasticity Special Applications Mechanics of Anisotropic Materials Micromodels for Continuous Fiber Composites Micromodels for Particulate Discontinuous Fiber Composites Introduction to Viscoelasticity Micromodels for Predicting Viscoelastic Behavior Transport Properties **Energy Research Abstracts** ,1991-10 Electrical Review ,1888
