## **World Affairs 2015 Atlas Work Sheet Answers:**

**The Atlas of Water** Maggie Black, 2016-09 Water may soon be one of our most valuable commodities. The growing demands made on a finite resource by an increasing number of people adopting urban lifestyles and western diets coupled with a changing and less predictable climate are putting pressure on the planet's freshwater supply as never before. By 2025 four billion people may be living in conditions of water stress. And even where water is plentiful the poor are unlikely to have ready access to a safe, cheap supply. The new edition of this timely atlas analyzes the latest thinking and emerging issues. Completely updated, it maps the competing claims on limited water resources made by farmers, industrialists, and householders and investigates the nature of the resource, its uses and abuses, as well as the vexed question of how it can be managed equitably. Page 4 of the cover. Global Health 101 Richard Skolnik, 2015-08-07 Rated by an independent panel as the best introductory Global Health text for undergraduates. Global Health 101 Third Edition is a clear, concise, and user-friendly introduction to the most critical issues in global health. It illustrates key themes with an extensive set of case studies, examples, and the latest evidence. Particular attention is given to the health development link to developing countries and to the health needs of poor and disadvantaged people. The Third Edition is a thorough revision that offers an extensive amount of new and updated information while maintaining clarity, simplicity, and ease of use for faculty and students. Offering the latest data on the burden of disease, the book presents unique content on key topics that are often insufficiently covered in introductory materials such as immunization and adolescent health. **Gender and Development** Janet Momsen, 2019-09-17 This revised and updated third edition of *Gender and Development* provides a concise, accessible introduction to gender and development issues in the developing world and in the transition countries of Eastern and Central Europe. There is also enhanced coverage of topics such as global trade, sport as a development tool, masculinities, and sustainable agriculture. Maps and statistics have been updated throughout, and their coverage widened. New case studies have been added on Bangladesh, violence in Peru, and India, and halal tourism and garbage collection in the Maldives. The book features student-friendly items such as chapter learning objectives, discussion questions, and annotated guides to further reading and websites. The text is enlivened throughout with examples and case studies drawn from the author's worldwide field research and consultancies with international development agencies over four decades, and her experience of teaching the topic to undergraduates and postgraduates in many countries. *Gender and Development* is the only broad-based introduction to the topic written specifically for a student audience.
